The Blood Countess - Andrei Codrescu
2015-07-21

A "brilliant" novel of Elizabeth Bathory, the notorious sixteenth-century Hungarian aristocrat who bathed in the blood of virgins (St. Petersburg Times). Turmoil reigns in post-Soviet Hungary when journalist Drake Bathory-Kereshtur returns from America to grapple with his family history. He's haunted by the legacy of his ancestor, the notorious sixteenth-century Countess Elizabeth Bathory, who is said to have murdered more than 650 young virgins and bathed in their blood to preserve her youth. Interweaving past and present, *The Blood Countess* tells the stories of Elizabeth's debauched and murderous reign and Drake's fascination with the eternal clashes of faith and power, violence and beauty. Codrescu traces the captivating origins of the countess's obsessions in tandem with the emerging political fervor of the reporter, building the narratives into an unforgettable, bloody crescendo. Taut and intense, *The Blood Countess* is a riveting novel that deftly straddles the genres of historical fiction, thriller, horror, and family drama.

[Media Studies](#) - Paul Marris 2000-03

Media Studies: A Reader provides a thorough introduction to the full range of theoretical perspectives on the mass media from the past thirty years. Ranging from the arguments between the American mass communication tradition and the Europe-centered Frankfurt School of the 1940s, to the analyses of communication technologies by Marshall

McLuhan and Raymond Williams in the 1960s, *Media Studies: A Reader* maps the mass media field, its varied and often conflicting histories, and its current debates. Sixty-five articles provide comprehensive coverage of all the main theorists and approaches. The first half, *Studying the Media*, explores in detail three core elements of media studies: production and regulation of mass media; media texts; and reception and consumption of media. The second half brings together concrete examples of how theoretical debates can be realized in a series of case studies on soap operas, the news, and advertising. A general introduction and introductions to each section summarize and contextualize the debates. Contributors include: Theodor W. Adorno, Marshal McLuhan, Raymond Williams, Stuart Hall, Annette Kuhn, Jürgen Habermas, John Fiske, Richard Dyer, Niki Strange, Danae Clark, Angela McRobbie, Bill Nichols, Lynne Joyrich, David Morley, Ien Ang, Janice Radway, Henry Jenkins, Tania Modleski, Anne McClintock, Sadie Plant.

The Ultimate Safari - Nadine Gordimer 2001

[Advanced Engineering Mathematics](#) - Alan Jeffrey 2001-06-19

Advanced Engineering Mathematics provides comprehensive and contemporary coverage of key mathematical ideas, techniques, and their widespread applications, for students majoring in engineering, computer science, mathematics and physics. Using a wide range of examples throughout the book, Jeffrey illustrates how to

construct simple mathematical models, how to apply mathematical reasoning to select a particular solution from a range of possible alternatives, and how to determine which solution has physical significance. Jeffrey includes material that is not found in works of a similar nature, such as the use of the matrix exponential when solving systems of ordinary differential equations. The text provides many detailed, worked examples following the introduction of each new idea, and large problem sets provide both routine practice, and, in many cases, greater challenge and insight for students. Most chapters end with a set of computer projects that require the use of any CAS (such as Maple or Mathematica) that reinforce ideas and provide insight into more advanced problems. Comprehensive coverage of frequently used integrals, functions and fundamental mathematical results Contents selected and organized to suit the needs of students, scientists, and engineers Contains tables of Laplace and Fourier transform pairs New section on numerical approximation New section on the z-transform Easy reference system

Casanova in Bohemia - Andrei Codrescu
2015-07-21

An erotic, comedic, and compulsively readable historical novel depicting the beguiling Giacomo Casanova as he looks back on a life of love and ribald adventure In Count Waldstein's far-flung Bohemian castle, an aging Casanova spends his days as a librarian cataloging the count's

extensive collection of books. Or at least that's what he's supposed to be doing. Ever the storyteller, Casanova instead dedicates himself to his own writing, for which the young servant Laura Brock serves as an endlessly fascinated audience. He recounts to her his greatest escapades—from romances in a Venetian convent to the seduction of an entire harem to the triumphant amassing (and subsequent loss) of a fortune in Paris. Enlivened by the French Revolution and the liberating ideas of the Enlightenment, Casanova's latest exploits prove he still possesses an intellectual vigor and insatiable curiosity. Even old age can't keep this legendary libertine—who corresponded with Voltaire, discussed flight with Benjamin Franklin, and whose life and writings inspired artists as diverse as Mozart, Flaubert, Stendhal, and Hesse—from causing trouble. Rich with eighteenth-century European social, political, and religious history, *Casanova in Bohemia* is an energetic and erotic portrait of Western literature's most beloved lothario, whose hedonism was matched by his creativity and wit.

Introducing Don DeLillo - Frank Lentricchia
1991-01-11

If you want to find out what a rock critic, a syndicated columnist, and scholars of American literature have to say about one of America's most important contemporary novelists, turn to *Introducing Don DeLillo*. Placing the author's work in a cultural context, this is the first book-length collection on DeLillo, adding considerably to the emerging critical discourse on his work.

Diversity is the key to this striking assemblage of cultural criticism edited by Frank Lentricchia. Special features include an expanded version of the Rolling Stone interview with the author ("An Outsider in this Society") and the extraordinary tenth chapter of DeLillo's *Ratner's Star*.

Accessibly written and entertaining, the collection will be of great interest to both students and scholars of contemporary American literature as well as to general readers interested in DeLillo's work. Contributors. Frank Lentricchia, Anthony Decurtis, Daniel Aaron, Hal Crowther, John A. McClure, Eugene Goodheart, Charles Molesworth, Dennis A. Foster, and John Frow
