**Enhancing the Postdoctoral Experience for Scientists and Engineers** - Institute of Medicine 2000-10-08

The concept of postdoctoral training came to science and engineering about a century ago. Since the 1960s, the performance of research in the United States has increasingly relied on these recent PhDs who work on a full-time, but on a temporary basis, to gain additional research experience in preparation for a professional research career. Such experiences are increasingly seen as central to careers in research, but for many, the postdoctoral experience falls short of expectations. Some postdocs indicate that they have not received the recognition, standing or compensation that is commensurate with their experience and skills. Is this the case? If so, how can the postdoctoral experience be enhanced for the over 40,000 individuals who hold these positions at university, government, and industry laboratories? This new book offers its assessment of the postdoctoral experience and provides principles, action points, and recommendations for enhancing that experience.

*Education and Training in Geo-Engineering Sciences* - Iacint Manoliu 2008-05-20

In recent years the International Society for Soil Mechanics and Geotechnical Engineering (ISSMGE), the International Association for Engineering Geology and Environment (IAEG), and the International Society for Rock Mechanics (ISRM) have concluded a Cooperation Agreement, leading to the foundation of the Federation of International Geo-engineering

**Wings to Fly** - Deepak Sharma 2022-07-19

Wings to Fly beautifully illustrates that instead of constantly climbing the ladders of success, sometimes we need to descend into the valley of truth and reality. Especially for those facing the acute heat of poverty,

insecurity, suffering, disabilities and inabilities. There is always an opportunity around us to sow the right seeds for the less beneficial people and weed out the superficial, false and futile possessions. All the compromises and sacrifices can be easily forgotten; like a mother, who bears all the pain while giving birth and raising her children. Deepak found the true meaning and purpose of his life while serving the underprivileged children at Udayan Care. He devoted his heart, mind, soul, wealth and body to them as a full-time volunteer and a guardian. The book convinces one that each child is a lotus waiting to blossom. They just need someone's support, guidance, care, handholding, and above all, quality time. The book intends to inspire one to make significant contributions to society, nature and the universe in multiple ways. Anyone can extend a hand of hope, become eyes for the blind, a voice for the mute, clutches for the crippled, destiny for the destitute and a lamp (Deepak) of light and hope for someone else. True exuberance and contentment are found when we rise above ourselves and learn to live for others.

Addressing the Nation's Changing Needs for Biomedical and Behavioral Scientists - National Research Council 2000-09-16

As biomedical and behavioral research progresses into new areas, the number of scientists active in various fields rises and falls, and the health needs of the U.S. population evolve, it is important to ensure that the preparation of future investigators reflects these changes. This book addresses these topics by considering questions such as the following: What is the current supply of biomedical and behavioral scientists? How is future demand for scientists likely to be affected by factors such as advances in research, trends in the employment of scientists, future research funding, and changes in health care delivery? What are the best ways to prepare prospective investigators to meet future needs in scientific research? In the course of addressing these questions, this volume examines the number of investigators trained every year, patterns of hiring by universities and industry, and the age of the

scientific workforce in different fields, and makes recommendations for the number of scientists that should be trained in the years ahead. This book also considers the diversity of the research workforce and the importance of providing prospective scientists with the skills to successfully collaborate with investigators in related fields, and offers suggestions for how government and universities should structure their research training programs differently in the future.

**Catalog of Federal Domestic Assistance - 2012**

Identifies and describes specific government assistance opportunities such as loans, grants, counseling, and procurement contracts available under many agencies and programs.
