Who Do We Choose To Be? -

Margaret J. Wheatley
2017-06-19

On the twenty-fifth anniversary of the publication of her classic *Leadership and the New Science*, bestselling author Margaret Wheatley once again turns to the new science of living systems to help leaders persevere in a time of great turmoil. I know it is possible for leaders to use their power and influence, their insight and compassion, to lead people

back to an understanding of who we are as human beings, to create the conditions for our basic human qualities of generosity, contribution, community and love to be evoked no matter what. I know it is possible to experience grace and joy in the midst of tragedy and loss. I know it is possible to create islands of sanity in the midst of wildly disruptive seas. I know it is possible because I have worked with leaders over many years in places that knew chaos and breakdown long before this moment. And I have studied enough history to know that such leaders always arise when they are most needed. Now it's our turn.

Weather on the Air - Robert Henson 2013-01-22

From low humor to high drama, TV weather reporting has encompassed an enormous range of styles and approaches, triggering chuckles, infuriating the masses, and at times even saving lives. In *Weather on the Air*, meteorologist and science journalist Robert Henson covers it all—the people, technology, science, and show business that combine to deliver the weather to the public each day. Featuring the long-term drive to professionalize weathercasting; the complex relations between government and private forecasters; and the effects of climate-change science and the Internet on today's broadcasts. With dozens of photos and anecdotes illuminating the many forces that have shaped weather broadcasts over the years, this engaging study will be an invaluable tool for students of broadcast meteorology and mass communication and an

entertaining read for anyone fascinated by the public face of weather.

Complex Systems Design & Management - Eric Bonjour 2018-11-19

This book contains all refereed papers accepted during the ninth edition of the conference that took place at the Cité Internationale Universitaire de Paris on December 18-19, 2018. Mastering complex systems requires an integrated understanding of industrial practices as well as sophisticated theoretical techniques and tools. This explains the creation of an annual go-between forum in Paris dedicated to academic researchers & industrial actors working on complex industrial systems architecture, modeling & engineering. These proceedings cover the most recent trends in the emerging field of Complex Systems, both from an academic and a professional perspective. A special focus is put on “Products & services development in a digital world”. The CSD&M Paris

2018 conference is organized under the guidance of CESAM Community

(<http://cesam.community/en>).

CESAM Community has been developed since 2010 by the non-profit organization

CESAMES Association to organize the sharing of good practices in Enterprise and

Systems Architecture and to certify the level of knowledge and proficiency in this field

through CESAM certification.

Secrets of Working Across Five Continents - Meltem Etcheberry 2020-11-20

As technology erodes the impact of time and distance, more and more people live and work across cultures. This book equips readers with the tools to embrace the richness and beauty brought by cultural diversity, and ultimately engage with the key skills for thriving in today's fast-paced, highly interconnected and interdependent world.

Unconformity-Related Uranium Deposits - International Atomic Energy Agency 2018-12-31

This publication provides a description of existing and

emerging technologies to effectively integrate geological, geophysical and geochemical data to recognize the footprint (i.e. the total extent that the mineralizing system has affected its environment) of the deposit and the key vectors to the uranium mineralization. In addition, insights into exploration strategies and risks associated with country and basin selection are discussed, including the role of the IAEA and academia in supporting the exploration process.

Representing an unprecedented, comprehensive reference document on unconformity-related uranium deposits with over 350 citations, this publication will be useful for decision makers at all levels, including governmental officers in energy and mineral resources, exploration companies, geologists, geological surveys, energy companies, universities and research institutions, and natural resource authorities.

Burning Questions -

Margaret Atwood 2022-03-01

From cultural icon Margaret Atwood comes a brilliant collection of essays--funny, erudite, endlessly curious,

uncannily prescient--which seek answers to Burning Questions such as: Why do people everywhere, in all cultures, tell stories? How much of yourself can you give away without evaporating? How can we live on our planet? Is it true? And is it fair? What do zombies have to do with authoritarianism? In over fifty pieces Atwood aims her prodigious intellect and impish humour at the world, and reports back to us on what she finds. This roller-coaster period brought the end of history, a financial crash, the rise of Trump and a pandemic. From debt to tech, the climate crisis to freedom; from when to dispense advice to the young (answer: only when asked) to how to define granola, we have no better guide to the many and varied mysteries of our universe.

Manifesta 13 Marseille -

Hedwig Fijen 2020-09-07

The Manifesta, which takes place every two years in a different European city, has a reputation for being a place for creativity and innovation, and

for good reason. Primarily responsible for this is festival's opening program, which was tested in 2018 in Palermo and is now being continued in Marseille in 2020. Winy Maas's architectural office, MVRDV, and The Why Factory were commissioned to explore the city's urban space through the means of artistic research and the latest method of data analysis. This resulted in a compendium of social, cultural, ethical, religious, and geographical structures. It was, however, meant to do more than just describe the status quo. The exploration also began a process that goes far beyond the Manifesta itself, to enrich Marseille's future as a city. This publication allows itself to become an audience and hence, part of the project. MVRDV was founded in 1991 and has its headquarters in Rotterdam. It is currently one of the most successful Dutch architectural offices. Besides Winy Maas, Jacob van Rijs and Nathalie de Vries are among its co-founders. Its trademark is the experimental, innovative

form in architectural design. Maas also heads up the THE WHY FACTORY (T-F), a research institute that explores the development of cities and designs urban models for the future.

Limits to Liberalization -

Patricia M. Goff 2007

The so-called culture industries--film, television and radio broadcasting, periodical and book publishing, video and sound recording--are noteworthy exceptions to the rhetorical commitment of Western countries to free trade as a major goal. These exceptions threatened to derail such high-profile negotiations as NAFTA and its predecessor, the Canada-US Free Trade Agreement, as well as the Uruguay Round of the GATT. Conventional wisdom did not foresee trouble from this source, because these established industries are not commercial national champions, nor are they particularly large providers of jobs. As Patricia M. Goff shows, the standard trade literature considers the monetary value

but doesn't recognize the symbolic importance of cultural production. In *Limits to Liberalization*, she traces the interplay between the commercial and the cultural. Governments that want to expand free trade may simultaneously resist liberalization in the culture industries (and elsewhere, including agriculture and health care). Goff traces the rationale for cultural protectionism in the trade policies of Canada, France, and the European Union. The result is a larger understanding of the forces that shape international trade agreements and a book that speaks to current theoretical concerns about national identity as it plays out in politics and international relations.

Uranium Extraction

Technology - International Atomic Energy Agency 1993
The purpose of this publication is to update and expand the first edition, which was published in 1983, and to report on later advances in uranium ore processing. It includes background information about the principles of the unit operations used in uranium ore processing and summarizes the current state of the art. Extensive references provide sources for specific technological details.

Driving Europe - Frank Schipper 2008

Today we can hardly imagine life in Europe without roads and the automobiles that move people and goods around. In fact, the vast majority of movement in Europe takes place on the road. Travelers use the car to explore parts of the continent on their holidays, and goods travel large distances to reach consumers. Indeed,

the twentieth century has deservedly been characterized as the century of the car. The situation looked very different around 1900. People crossing national borders by car encountered multiple hurdles on their way. Technically, they imported their vehicle into a neighboring country and had to pay astronomical import duties. Often they needed to pass a driving test in each country they visited. Early on, automobile and touring clubs sought to make life easier for traveling motorists. International negotiations tackled the problems arising from differing regulations. The resulting volume describes everything from the standardized traffic signs that saved human lives on the road to the Europabus taking tourists from Stockholm to Rome in the 1950s. *Driving Europe* offers a highly original portrait of a Europe built on roads in the course of the twentieth century.

Virtual Art - Oliver Grau
2004-09-17

An overview of the art historical antecedents to virtual reality and the impact of virtual reality on contemporary conceptions of art. Although many people view virtual reality as a totally new phenomenon, it has its foundations in an unrecognized history of immersive images. Indeed, the search for illusionary visual space can be traced back to antiquity. In this book, Oliver Grau shows how virtual art fits into the art history of illusion and immersion. He describes the metamorphosis of the concepts of art and the image and relates those concepts to interactive art, interface design, agents, telepresence, and image evolution. Grau retells art history as media history, helping us to understand the phenomenon of virtual reality beyond the hype. Grau shows how each epoch used the technical means available to produce maximum illusion. He discusses frescoes such as those in the Villa dei Misteri in Pompeii and the gardens of the Villa Livia near

Primaporta, Renaissance and Baroque illusion spaces, and panoramas, which were the most developed form of illusion achieved through traditional methods of painting and the mass image medium before film. Through a detailed analysis of perhaps the most important German panorama, Anton von Werner's 1883 The Battle of Sedan, Grau shows how immersion produced emotional responses. He traces immersive cinema through Cinerama, Sensorama, Expanded Cinema, 3-D, Omnimax and IMAX, and the head mounted display with its military origins. He also examines those characteristics of virtual reality that distinguish it from earlier forms of illusionary art. His analysis draws on the work of contemporary artists and groups ART+COM, Maurice Benayoun, Charlotte Davies, Monika Fleischmann, Ken Goldberg, Agnes Hegedues, Eduardo Kac, Knowbotic Research, Laurent Mignonneau, Michael Naimark, Simon Penny, Daniela Plewe,

Paul Sermon, Jeffrey Shaw, Karl Sims, Christa Sommerer, and Wolfgang Strauss. Grau offers not just a history of illusionary space but also a theoretical framework for analyzing its phenomenologies, functions, and strategies throughout history and into the future.

Choosing a Map Projection - Miljenko Lapaine 2017-04-04

This book offers a much-needed critical approach to the intelligent use of the wide variety of map projections that are rapidly and inexpensively available today. It also discusses the distortions that are immanent in any map projection. A well-chosen map

projection is one in which extreme distortions are smaller than those in any other projection used to map the same area and in which the map properties match its purpose. Written by leading experts in the field, including W. Tobler, F.C. Kessler, S.E. Battersby, M.P. Finn, K.C. Clarke, V.S. Tikunov, H. Hargitai, B. Jenny and N. Frančula. This book is designed for use by laymen. The book editors are M. Lapaine and E.L. Uesry, Chair and Vice-Chair, respectively, of the ICA Commission on Map Projections for the period 2011-2015.

Fall - John Preston 2021-02-09
Winner of the UK's 2022 Costa Prize for Biography "A portrait of one of the most enigmatic figures in the annals of white-collar crime. . . . A well-researched, compelling book that uncovers many mysteries about a media tycoon."—Kirkus Reviews From the acclaimed author of *A Very English Scandal*, a thrilling and dramatic true-life account of the rise and fall of one of the

most notorious media moguls of all time: Robert Maxwell. In February 1991, Robert Maxwell triumphantly sailed into Manhattan harbor on his yacht, the *Lady Ghislaine*, to buy the ailing *New York Daily News*. Taxi drivers stopped their cabs to shake his hand, children asked for his autograph, and patrons of the hottest restaurant in Manhattan gave him a standing ovation while he dined. Ten months later, Maxwell disappeared off that same yacht in the middle of the night and was later found dead in the water. As John Preston reveals in this entertaining and revealing biography, Maxwell's death was as mysterious as his remarkable life. A tightly paced, addictive saga of ambition, hubris, narcissism, greed, power, and intrigue, Fall recounts Maxwell's rise and fall and rise and fall again. Preston weaves backwards and forwards in time to examine the forces that shaped Maxwell, including his childhood as a Jew in occupied Eastern Europe through his

failed political ambitions in the 1960s which ended in accusations of financial double-dealing, and his resurrection as a media mogul--and on to the family legacy he left behind, including his daughter Ghislaine Maxwell. Preston chronicles Maxwell's all-encompassing rivalry with Rupert Murdoch—a battle that ruined Maxwell financially, threatened his sanity and lead, indirectly, to his death. Did Maxwell have a heart attack and fall overboard? Was his death suicide? Or was he murdered—possibly by Mossad or the KGB? Few in the twentieth century journeyed as far from his roots as Robert Maxwell. Yet, as Fall reveals, no one, however rich and powerful, can entirely escape their past.

Young People on the Margins - Loic Menzies 2021-03-31
Our society leaves too many young people behind. More often than not, these are the most vulnerable young people, and it is through no fault of their own. Building a fair society and an equitable education system rests on bringing in and supporting them. By drawing together more than a decade of studies by the UK's Centre for Education and Youth, this book provides a new way of understanding the many ways young people in England are pushed to the margins of the

education system, and in turn, society. Each contributor shares the personal stories of the young people they have encountered over the course of their fieldwork and practice, combining this with accessible syntheses of previous studies, alongside extensive analysis of national datasets and key publications. By unpicking the many overlapping factors that contribute to different groups' vulnerability, the book demonstrates the need to understand each young person's life story and to respond quickly and collaboratively to the challenges they face. The chapters conclude with action points highlighting the steps individuals, institutions and policy makers can take to bring young people in from the margins. Young People on the Margins showcases first-hand examples of where these young people's needs are being addressed and trends bucked, drawing out what can and must be learned, for teachers, leaders, youth workers and policy makers.

Cinematic Urban Geographies - François Penz 2017-07-12

This book proposes new methodological tools and approaches in order to tease out and elicit the different facets of urban fragmentation through the medium of cinema and the moving image, as a contribution to our understanding of cities and their topographies. In doing so it makes a significant contribution to the literature in the growing field of cartographic cinema and urban cinematics, by charting the many trajectories and points of contact between film and its

topographical context. Under the influence of new technologies, the opening and the availability of previously unexplored archives but also the contribution of new scholars with novel approaches in addition to new work by experienced academics, Cinematic Urban Geographies demonstrates how we can reread the cinematic past with a view to construct the urban present and anticipate its future.

The History of Cartography: Cartography in prehistoric,

ancient, and medieval Europe and the Mediterranean

- John Brian Harley 2015-04-21

From satellite imaging techniques to the Internet, the technologies of the twentieth century transformed both the production and consumption of maps. Volume 6 of the authoritative "History of Cartography" series covers this pivotal century, in which mapping became an important tool for coping with complexity, organizing knowledge, and influencing public opinion in all parts of the globe and at all levels of society. The first volume in the long-running series to be arranged in encyclopedic format, it includes 529 articles ranging from short biographical sketches of key individuals and institutions to multipart entries on such broad topics as Topographic Mapping, Military Mapping by Major Powers, and Wayfinding and Travel Maps. Editor Mark Monmonier and more than 300 expert contributors offer both original factual research often based on

their own participation in the developments they describe and interpretation of larger trends in cartography. Each entry includes bibliographical references, and the volume is illustrated with more than 1,100 images, the majority of them in full color."

Marketing Identities Through Language - E. Martin
2005-11-30

Elizabeth Martin explores the impact of globalization on the language of French advertising, showing that English and global imagery play an important role in tailoring global campaigns to the French market, with media companies undeterred by the attempts through legislation to curb language mixing in the media.
