[Blended Synchronous Learning](#) - Matt G Bower 2014-11-07

Blended synchronous learning - where remote students participate in face-to-face classes by means of rich-media synchronous technologies such as video conferencing, web conferencing and virtual worlds - is an emerging phenomenon in education. More and more teachers are attempting to teach in this challenging mode, but without any systematic research evidence to help guide their blended synchronous learning practices. The Blended Synchronous Learning Handbook is a definitive resource that addresses this issue. It includes a Blended Synchronous Learning Design Framework that offers pedagogical, technological and logistical recommendations for teachers attempting to design and implement blended synchronous learning lessons. It also includes a Rich-Media Synchronous Technology Capabilities Framework to support the selection of technologies for different types of learning activities, as well as a review of relevant literature, a summary of the Blended Synchronous Learning Scoping Study, detailed reports of seven blended synchronous learning case studies, and an in-depth cross case analysis to underpin the recommendations that are drawn.

Eco-Fearism - Bhawani Shankar Adhikari 2020-05-05

In a world full of doubt and despair, we are yet to realize the invaluable importance of societal coherence and correspondence, especially in relation to our planet's ecosystem. Intelligent, empathetic life, such as ourselves, has limitless potential to co-create and edify a new paradigm of smart coexistence, if we manage to get fear under control. The society that we have constructed has undervalued life's potential because of individualistic separatism that seems to have been born out of fear of survival. Our fears of going extinct should be, counter-intuitively enough, not only a motivation for us to thrive in meaningful coexistence, but also an inspiration for us to be able to build a future that is worthy of our true capacities. As we dive deeper into Eco-Fearism, breaking the boundaries of our limitations and striving for excellence, we are enlightened by knowledge and by the hope that we can surpass our own immaturity and take care of ourselves and our planet through careful reflection.

Research on Teaching and Learning Probability - Carmen Batanero 2016-07-12

This book summarizes the vast amount of research related to teaching and learning probability that has been conducted for more than 50 years in a variety of disciplines. It begins with a synthesis of the most important probability interpretations throughout history: intuitive, classical, frequentist, subjective, logical

propensity and axiomatic views. It discusses their possible applications, philosophical problems, as well as their potential and the level of interest they enjoy at different educational levels. Next, the book describes the main features of probabilistic thinking and reasoning, including the contrast to classical logic, probability language features, the role of intuitions, as well as paradoxes and the relevance of modeling. It presents an analysis of the differences between conditioning and causation, the variability expression in data as a sum of random and causal variations, as well as those of probabilistic versus statistical thinking. This is followed by an analysis of probability's role and main presence in school curricula and an outline of the central expectations in recent curricular guidelines at the primary, secondary and high school level in several countries. This book classifies and discusses in detail the three different research periods on students' and people's intuitions and difficulties concerning probability: early research focused on cognitive development, a period of heuristics and biases programs, and the current period marked by a multitude of foci, approaches and theoretical frameworks.

[The Cambridge Handbook of Instructional Feedback](#) - Anastasiya A. Lipnevich 2018-12-31

This book brings together leading scholars from around the world to provide their most influential thinking on instructional feedback. The chapters range from academic, in-depth reviews of the research on instructional feedback to a case study on how feedback altered the life-course of one author. Furthermore, it features critical subject areas - including mathematics, science, music, and even animal training - and focuses on working at various developmental levels of learners. The affective, non-cognitive aspects of feedback are also targeted; such as how learners react emotionally to receiving feedback. The exploration of the theoretical underpinnings of how feedback changes the course of instruction leads to practical advice on how to give such feedback effectively in a variety of diverse contexts. Anyone interested in researching instructional feedback, or providing it in their class or course, will discover why, when, and where instructional feedback is effective and how best to provide it.

Abrupt Climate Change - National Research Council 2002-04-23

The climate record for the past 100,000 years clearly indicates that the climate system has undergone periodic--and often extreme--shifts, sometimes in as little as a decade or less. The causes of abrupt climate changes have not been clearly established, but the triggering of events is likely to be the result of multiple natural processes. Abrupt climate changes of the magnitude seen in the past would have far-reaching implications for human society and ecosystems, including major impacts on energy consumption and water supply demands. Could such a change happen again? Are human activities exacerbating the likelihood of abrupt climate change? What are the potential societal consequences of such a change? Abrupt Climate Change: Inevitable Surprises looks at the current scientific evidence and theoretical understanding to describe what is currently known about abrupt climate change, including patterns and magnitudes, mechanisms, and probability of occurrence. It identifies critical knowledge gaps concerning the potential for future abrupt changes, including those aspects of change most important to society and economies, and outlines a research strategy to close those gaps. Based on the best and most current research available, this book surveys the history of climate change and makes a series of specific recommendations for the future.

The CERT C Secure Coding Standard - Robert C. Seacord 2008-10-14

“I’m an enthusiastic supporter of the CERT Secure Coding Initiative. Programmers have lots of sources of advice on correctness, clarity, maintainability, performance, and even safety. Advice on how specific language features affect security has been missing. The CERT® C Secure Coding Standard fills this need.”
–Randy Meyers, Chairman of ANSI C “For years we have relied upon the CERT/CC to publish advisories documenting an endless stream of security problems. Now CERT has embodied the advice of leading technical experts to give programmers and managers the practical guidance needed to avoid those problems in new applications and to help secure legacy systems. Well done!” –Dr. Thomas Plum, founder of Plum Hall, Inc. “Connectivity has sharply increased the need for secure, hacker-safe applications. By

combining this CERT standard with other safety guidelines, customers gain all-round protection and approach the goal of zero-defect software.” –Chris Tapp, Field Applications Engineer, LDRA Ltd. “I’ve found this standard to be an indispensable collection of expert information on exactly how modern software systems fail in practice. It is the perfect place to start for establishing internal secure coding guidelines. You won’t find this information elsewhere, and, when it comes to software security, what you don’t know is often exactly what hurts you.” –John McDonald, coauthor of The Art of Software Security Assessment
Software security has major implications for the operations and assets of organizations, as well as for the welfare of individuals. To create secure software, developers must know where the dangers lie. Secure programming in C can be more difficult than even many experienced programmers believe. This book is an essential desktop reference documenting the first official release of The CERT® C Secure Coding Standard . The standard itemizes those coding errors that are the root causes of software vulnerabilities in C and prioritizes them by severity, likelihood of exploitation, and remediation costs. Each guideline provides examples of insecure code as well as secure, alternative implementations. If uniformly applied, these guidelines will eliminate the critical coding errors that lead to buffer overflows, format string vulnerabilities, integer overflow, and other common software vulnerabilities.

Exotic Fearology - Bhawani Shankar Adhikari 2020-09-09

Exotic Fearology is the burning issues of ecology and its effects in relation to human life. Nature is beyond her tolerance via humans' misconduct. The balance between humans and other living creatures is as inevitable as eco friendly life to continue with harmony in nature. It is too late to protect nature and it is inevitable to apply the concise human conscience on time to protect the sound life of the Earth. The agony felt by the seas, Airports and Earth is to be realized and understood by humans as conscious beings. The language of nature is inevitable to know if we want to maintain peace and harmony in nature. The coronavirus is the outcome of wrongdoings over nature and if we do not become conscious on time, it may cause more dangerous virus in future. Fearology is the only doctrine to deal cultural fear and other social fears that come on Earth in new Era as the Era of coronavirus. It is concerned with the degrading condition

of nature and the detrimental effects of it in the global crisis caused via misconduct in nature as it has already been witnessed via coronavirus in the world. Positive principle of fearology is to be vibrated in the conscious conscience of all levels of people to keep traumatic situation at bay even at the time of global pandemic. Humans cannot escape from the natural calamities and it is always essential to be humble with the nature to live with natural harmony. Ideas of the text are based on direct observation via the expression of people's countenance in various places especially in the airports during spreading condition of coronavirus.
