**Blockchain Technology** - Sudeep Tanwar 2022-06-17

Blockchain is an emerging technology platform for developing decentralized applications and data storage, over and beyond its role as the technology underlying the cryptocurrencies. The basic tenet of this platform is that it allows one to create a distributed and replicated ledger of events, transactions, and data generated through various IT processes with strong cryptographic guarantees of tamper resistance, immutability, and

verifiability. Public blockchain platforms allow us to guarantee these properties with overwhelming probabilities even when untrusted users are participants of distributed applications with the ability to transact on the platform. Even though, blockchain technology has become popularly known because of its use in the implementation of cryptocurrencies such as BitCoin, Ethereum, etc.; the technology itself holds much more promise in various areas such as time stamping, logging of critical events in a system, recording of transactions, trustworthy e-governance, etc. It introduces theoretical and practical aspects of blockchain technology. The book includes an in-depth insight into the need for decentralization, smart contracts, consensus both permissioned and permissionless, and various blockchain development frameworks, tools, and platforms. It can be used as a learning resource for various examinations and certifications related to cryptocurrency and

blockchain technology. This book explained the nuts and bolts of blockchain technology in lucid language to make students more familiar with the implementation perspective of this much-needed technology. [Question Bank in Postharvest Technology](#) - Sps Guleria

**Synthetic Seeds** - Mohammad Faisal 2019-11-23

This book introduces the reader to synthetic or artificial seeds, which refer to algininate encapsulated somatic embryos, vegetative buds or any other micropropagules that can be used as seeds and converted into plantlets after propagating under in vitro or in vivo conditions. Moreover, synthetic seeds retain their potential for regeneration even after low-temperature storage. The production of synthetic or artificial seeds using micropropagules opens up new vistas in agricultural biotechnology. Encapsulated propagules could be used for in vitro regeneration and mass multiplication at reasonable cost. In addition, these propagules may be used for germplasm preservation of elite plant species and the exchange of plant materials between national and

international laboratories. This book offers state-of-the-art findings on methods, applications and prospects of synthetic or artificial seeds.

Advances in Seed Production and Management - Ajay Kumar Tiwari 2021-03-30

High-quality seed is essential for healthy crops and greater agricultural productivity. At the

same time, advances in breeding technology require equivalent advances in seed technology. In order to ensure food security, it is crucial to develop seeds that are high yielding, and resistant to drought, heat, cold, and insects. Gathering the latest research in seed sciences, the book includes contributions on seed production in crops such as legumes, sugar, rice, wheat and other cereals. It discusses a range of topics, like the effect of climate change on seed quality, production and storage; seed rouging; seed certification for different crop species; seed biology; and seed pathologies and their effective management. Integrating basic and applied research, this compendium provides valuable insights for researchers and students in agricultural and life sciences; professionals involved in seed certification and those working in quarantine laboratories; as well as plant pathologists.

In writing the first edition, the aim is to provide all simple and difficult questions for weak

students in plant molecular biology that have no more knowledge and have more problems in solving the questions. Therefore, in this book we included questions belongs to all basic concept of molecular biology which will provide strong knowledge to students preparing for competitive exams of life science like CSIR-NET, DBT-JRF, ICMR-JRF, ICAR-NET, ARS, PSC, graduate and post-graduate exams.

### **MCQs in Plant Breeding Biotechnology and Seed Science - K. Vanangamudi**

2019-01-01

The book on "MCQ's in Plant Breeding, Biotechnology and Seed Science" has been prepared with the idea of exposing the students those who are preparing for the competitive examinations like Agricultural Research Services, NET, Public Service Commissions, Institute of Banking Personnel Selection, University and Institute admissions etc. It has three major parts viz., Plant Breeding, Biotechnology and

Seed Science. The book has 80 chapters consisting more than 3000 multiple choice questions with answers. Genetics, breeding methods, resistance breeding, mutation breeding and polyploidy breeding in Plant Breeding; cell biology, molecular biology, tissue culture, animal biotechnology and bioinformatics in Biotechnology; and seed formation, biology, production, post harvest processing, storage, health, marketing and legislation in Seed Science are some of the important chapters covered in the book. The book is prepared with latest informations and therefore, it will be highly useful to the teachers, scientists and students for updating their knowledge.

**Key to Success in  
Agriculture: Objective  
(MCQ's for JRF, SRF, NET &  
Other Competitive Exams) -**

B.N. Kalsariya 2017-05-01  
The knowledge on Agriculture is continuously improved, updated, and disseminated. It is also important that the review and inventory of the

'State of the Art' in agriculture objectives questions and best practices should be shared widely among agriculture practitioners, educators and scholars. Through Competitive Examinations, there is direct recruitment for admission and high position in our education system; the pattern followed is M.C.Q's or Objective type questions in such examinations. The book is a repository of more than 6,000 objective questions; which calls for quick answering for success within a specified period in the examinations. A sincere effort has been made by different authors to present them in most easy, short and understandable language for the benefit of students, teachers and those who are interested in Agriculture and Agricultural Extension.

Majorly, all different aspects of Agriculture Discipline are provided in the book, which are a part of various Agricultural Universities syllabi. This book will be of great service, to the students aiming for higher level competitive examination

such as NET, ARS, JRF, SRF, UG and PG entrance examinations.

*Objective Plant Physiology 3rd Revised Edition: MCQs in Plant Physiology* - P. Dwivedi  
2019-04-11

This book has been written to meet the specific needs of candidates appearing in Agriculture Research Services, CSIR, TIFR/NCBS, IISc (Bangalore), GATE, IIT-JAM, JRF, SRF, and Biology Olympiads and other competitive examinations. A large number of mind-boggling questions of advance levels are presented. We have tried our best with wide array of questions covering minutest details of the subject in simpler form. Objective Plant Physiology is an exclusive fundamental search based collection of multiple choice questions prepared for students mainly to help them revise, consolidate and improve their knowledge and skills. The book comprises of twenty nine chapters covering different aspects of plant physiology containing more than 2650

questions accompanied with their answers.

**MCQ's On Forestry** - Dr. Nilay Kumar 2020-09-15

This book has been developed for aspiring graduate and postgraduate forestry students appearing in various state and national level exams such as ICAR-JRF, SRF, ARS, NET, RO, ACF, IFS prelims. It covers all the core subjects of the forestry along with some untouched topics such as Rangeland Management, Forest Engineering, Forest Economics, Forest Tree Seed Technology, Statistics, Tree Physiology, Forest Soils, Forest Protection and General Agriculture. Efforts are made to cover all the important topics from the examination point of view. The main aim of the book is to provide all the important information related to forestry asked in various competitive examinations. All the important fact and figures have been provided in a brief to make it easy to understand and learn. There is a critical need of knowledge for competitive exam in forestry,

therefore this book has been written for encouraging competitive skills for graduate and postgraduate students for taking admissions in ICAR or ICFRE institutes especially in forestry and allied discipline. PISA Take the Test Sample Questions from OECD's PISA Assessments - OECD
