What Your Second Grader Needs to Know - E.D. Hirsch, Jr. 2009-07-29

From the Introduction: "What kind of knowledge and skills can your child be expected to learn in second grade at school? How can you help your child at home? These are questions that we try to answer in this book. It presents the sort of knowledge and skills—in literature, reading and writing, history and geography, visual arts, music, mathematics, and science—that should be at the core of a challenging second-grade education. Because children and localities differ greatly across this big, diverse country, so do second-grade classrooms. But all communities, including classrooms, require some common ground for communication and learning. In this book we present the

specific shared knowledge that hundreds of parents and teachers across the nation have agreed upon for American second graders. This core is not a comprehensive prescription for everything that every second grader needs to know. Such a complete prescription would be rigid and undesirable. But the book does offer a solid common ground that will enable young students to become active, successful learners in their classroom community and later in the larger communities we live in—town, state, nation, and world." **BONUS:** This edition includes an excerpt from *What Your Third Grader Needs to Know*.

Learning to Read: An Integrated View from Research and Practice - Terezinha Nunes 2012-12-06

Literacy research has continued to develop at a rapid pace in these last five years of the millennium. New ideas about how children learn to read have led to a better understanding of the causes of progress and failure in the mastery of literacy, with repercussions for children's assessment and teacher education. These new discoveries also allow teachers to transcend the old debates in reading instruction (phonics versus whole language) and offer the path to a synthesis. At the same time, research with teachers about their own implementation of methods and the development of their own knowledge about the teaching of literacy has produced a fresh analysis of the practice of literacy teaching. Inspired by these developments, teachers, teacher educators and researchers worked together to produce this volume, which promotes the integration of literacy research and practice.
