Versace - Mariuccia Casadio 1998

Versace style is a unique mix of sensuality and modernity, its imagery an alchemical blend of the historical and contemporary. These unashamedly luxurious garments have the courage to gleam from head to toe, each semiprecious stone, piece of paste or glint of metal adding an electric quality to the impeccable line of the cut. Unprecedented asymmetries exalt the body. Exuberant prints explode with vitality and daring across the surface of the fabric. Shoes, belts and collars studded with gems proclaim a frank delight in gaudy excess. Profoundly international, a Versace style represents the triumph of Italian sartorial perfection hybridized with the Anglo-Saxon culture of individual freedom and the French love of the spectacular. Creator of the supermodel, collaborator with some of the biggest names in the contemporary photography, friend to rock stars, royals and actors, Gianni Versace was beyond question one of the most innovative, experimental and unpredictable figures of the second half of the twentieth century. This book explores his incomparable legacy. It includes 177 illustrations, 55 in colour.

Tiger Country - Nina Raine 2014-12-11

Nina Raine's *Tiger Country* is a hospital play that follows a tangle of doctors and nurses in a busy London hospital - from the award-winning author of *Tribes*. Professionalism and prejudice, turbulent staff romances, ambition and failure collide in this swirling, action-packed drama about an overburdened health service that we all depend on and the dedicated individuals that keep it going. 'Tiger country' is where animal instinct stirs and an irrefutable eye opens. Where we make eye contact with the unknown. *Tiger Country* was premiered at Hampstead Theatre in 2011 and, following its sell-out run, was revived there in 2014.

Queen of the Court - Serena Williams 2009

One of the biggest stars in tennis, Serena Williams has captured every major title. Her 2009 Australian Open championship earned her the number one world ranking for the third time in her illustrious career-and marked only the latest exclamation point in a life well and purposefully lived. As a young girl, Serena began training with an adult-size racquet that was almost as big as she was. Rather than dropping the racquet, Serena saw it as a challenge to overcome - and she has confronted every obstacle on her path to success with the same unflagging spirit. From growing up in the tough, hardscrabble neighborhood of Compton, California, to being trained by her father on public tennis courts littered with broken glass and drug paraphernalia, to becoming the top women's player in the world, Serena has proven to be an inspiration to her legions of fans both young and old. Her accomplishments have not been won without struggle. She has been derailed by injury, criticized for her unorthodox approach to tennis, and was devastated by the tragic shooting of her older sister. Yet somehow Serena always manages to prevail, both on and off the court. She's applied the same strength and determination that helped her to become a champion to her successful pursuits in philanthropy, fashion, television, and film. In this compelling and poignant memoir, Serena takes an empowering look at her extraordinary life and what is still to come.

Achtung-Panzer! - Heinz Guderian 1995

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

From Jailer to Jailed - Bernard B. Kerik 2015-03-31

The controversial New York City police commissioner and New York Times bestselling author of *The Lost Son* shares the story of his fall from grace and the effects of his incarceration on his views of the American justice system. Bernard Kerik was New York City's police commissioner during the 9/11 attacks, and became an American hero as he led the NYPD through rescue and recovery efforts of the World Trade Center. His résumé as a public servant is long and storied, and includes receiving a Medal of Honor. In 2004, Kerik was nominated by George W. Bush to head the Department of Homeland Security. Now, he is a former Federal Prison Inmate known as #84888-054. Convicted of tax fraud and false statements in 2007, Kerik was sentenced to four years in federal prison.

Now, for the first time, he talks candidly about what it was like on the inside: the torture of solitary confinement, the abuse of power, the mental and physical torment of being locked up in a cage, the powerlessness. With newfound perspective, Kerik makes a plea for change and illuminates why our punishment system doesn't always fit the crime. In this extraordinary memoir, Kerik reveals his unprecedented view of the American penal system from both sides: as the jailer and the jailed. With astonishing candor, bravery, and insider's intelligence, Bernard Kerik shares his fall from grace to incarceration, and turns it into a genuine and uniquely insightful argument for criminal justice reform.

How We Reason - Philip Johnson-Laird 2008-10-23

Good reasoning can lead to success; bad reasoning can lead to catastrophe. Yet, it's not obvious how we reason, and why we make mistakes - so much of our mental life goes on outside our awareness. In recent years huge strides have been made into developing a scientific understanding of reasoning. This new book by one of the pioneers of the field, Philip Johnson-Laird, looks at the mental processes that underlie our reasoning. It provides the most accessible account yet of the science of reasoning. We can all reason from our childhood onwards - but how? 'How we reason' outlines a bold approach to understanding reasoning. According to this approach, we don't rely on the laws of logic or probability - we reason by thinking about what's possible, we reason by seeing what is common to the possibilities. As the book shows, this approach can answer many of the questions about how we reason, and what causes mistakes in our reasoning that can lead to disasters such as Chernobyl. It shows why our irrational fears may become psychological illnesses, why terrorists develop 'crazy' ideologies, and how we can act in order to improve our reasoning. The book ends by looking at the role of reasoning in three extraordinary case histories: the Wright brothers' use of analogies in inventing their flyer, the cryptanalysts' deductions in breaking the German's Enigma code in World War II, and Dr. John Snow's inductive reasoning in discovering how cholera spread from one person to another. Accessible, stimulating, and controversial, *How we Reason* presents a bold new approach to understanding one of the most intriguing facets of being human.
