Germany's New Security Demographics - Wenke Apt 2013-12-04

Military recruitment will become more difficult in times of demographic aging. The question arises whether demographic change will constrain the capacity of aging states like Germany to conduct foreign policy and pursue their national security interests. Since contemporary military operations still display a strong human element, particular scrutiny is given to the empirical analysis of the determinants of military propensity and military service among youth. An additional human capital projection until 2030 illustrates how the decline in the youth population will interact with trends in educational attainment and adolescent health to further complicate military recruitment in the future. A concluding review of recruiting practices in other NATO countries provides insight in best-practice policy options to reduce the military's sensitivity to demographic change. Following this approach, the book gives prominence to a topic that has thus far been under-represented in the greater discussion of demographic change today, namely the demographic impact on international affairs and strategic calculations.

Exploring and Optimizing Agricultural Landscapes - Lothar Mueller 2021-06-14

The book informs about agricultural landscapes, their features, functions and regulatory mechanisms. It characterizes agricultural production systems, trends of their development, and their impacts on the landscape. Agricultural landscapes are multifunctional systems, coupled with all nexus problems of the 21st century. This has led to serious discrepancies between agriculture and environment, and between urban and rural population. The mission, key topics and methods of research in order to understanding, monitoring and controlling processes in rural landscapes is being explained. Studies of international expert teams, many of them from Russia, demonstrate approaches towards both improving agricultural productivity and sustainability, and enhancing ecosystem services of agricultural landscapes. Scientists of different disciplines, decision makers, farmers and further informed people dealing with the evolvement of thriving rural landscapes are the primary audience of this book.

Typology of Knowledge, Skills and Competences - Jonathan Winterton 2006

The third in a series of Cedefop publications dealing with technical aspects of the European Qualification Framework and European Credit Transfer System, this book analyses current practice in countries that have made progress with evaluating and defining competence. It proposes a typology of knowledge, skills and competence, to be used not as an instrument of 'harmonisation' between countries, but as a template to enable comparison. The aim is to promote mobility in every sense, bringing work-based learning and knowledge acquired in higher education closer together.

Health Financing in Indonesia - 2009-01-01

In 2004 the Indonesian government made a commitment to provide its entire population with health insurance coverage through a mandatory public health insurance scheme. It has moved boldly already provides coverage to an estimated 76.4 million poor and near poor, funded through the public budget. Nevertheless, over half the population still lacks health insurance coverage, and the full fiscal impacts of the government's program for the poor have not been fully assessed or felt. In addition, significant deficiencies in the efficiency and equity of the current health system, unless addressed will exacerbate cost pressures and could preclude the effective implementation of universal coverage (Ue and the desired result of improvements in population health outcomes and financial protection. For Indonesia to achieve UC, systems' performance must be improved and key policy choices with respect to the configuration of the health financing system must be made.

Indonesia's health system performs well with respect to some health outcomes and financial protection, but there is potential for significant improvement. High-level political decisions are necessary on key elements of the health financing reform package. The key transitional questions to get there include: [the benefits that can be afforded and their impacts on health outcomes and financial protection; [how the more than 50 percent of those currently without coverage will be insured; [how to pay medical care providers to assure access, efficiency, and quality; [developing a streamlined and efficient administrative structure; [how to address the current supply constraints to assure availability of promised services; [how to raise revenues to finance the system, including the program for the poor as well as currently uninsured groups that may require government subsidization such as the more than 60 million informal sector workers, the 85 percent of workers in firms of less than five employees, and the 70 percent of the population living in rural areas.

Hidden Hunger - Aya Hirata Kimura 2013-02-15

For decades, NGOs targeting world hunger focused on ensuring that adequate quantities of food were being sent to those in need. In the 1990s, the international food policy community turned its focus to the "hidden hunger" of micronutrient deficiencies, a problem that resulted in two scientific solutions: fortification, the addition of nutrients to processed foods, and biofortification, the modification of crops to

produce more nutritious yields. This hidden hunger was presented as a scientific problem to be solved by "experts" and scientifically engineered smart foods rather than through local knowledge, which was deemed unscientific and, hence, irrelevant. In *Hidden Hunger*, Aya Hirata Kimura explores this recent emphasis on micronutrients and smart foods within the international development community and, in particular, how the voices of women were silenced despite their expertise in food purchasing and preparation. Kimura grounds her analysis in case studies of attempts to enrich and market three basic foods—rice, wheat flour, and baby food—in Indonesia. She shows the power of nutritionism and how its technical focus enhanced the power of corporations as a government partner while restricting public participation in the making of policy for public health and food. She also analyzes the role of advertising to promote fortified foodstuffs and traces the history of Golden Rice, a crop genetically engineered to alleviate vitamin A deficiencies. Situating the recent turn to smart food in Indonesia and elsewhere as part of a long history of technical attempts to solve the Third World food problem, Kimura deftly analyzes the intersection of scientific expertise, market forces, and gendered knowledge to illuminate how hidden hunger ultimately defined women as victims rather than as active agents.

The German Chambers of Commerce and Industry - Eberhard Sasse 2021
This open access book examines a particular factor in the enduring international success of German companies. Beyond industrial specialization, peaceful labor relations, local financial markets and the "miracle of the Mittelstand", it focuses on a characteristic aspect of governance within the German economy: The Chambers of commerce and industry. Important characteristics of the Chamber system are emphasized - including obligatory membership for firms as well as participatory rules of their self-administration. In turn, the book examines the institution's self-governance, its services, and its mission regarding the general representation of interests. Moreover, the book also identifies the advancement of the dual system of professional education as a central element of the Chamber system. Following an introduction about how the Chamber system works, interviews, case studies and historical explanations help to exemplify the true spirit inherent to this form of representation. In particular, they reveal the essence of how the Chambers contribute to the global success of German companies and foster their corporate responsibility in a practical way. Given its scope, the book will be of particular interest to professionals, policymakers and researchers concerned with how institutional organization can support commerce and industry for the public good. The book was developed in collaboration with Laura Sasse and the Practical Wisdom Society.--

Global Perspectives on Recognising Non-formal and Informal Learning - Madhu Singh 2015-06-05

This book deals with the relevance of recognition and validation of non-formal and informal learning education and training, the workplace and society. In an increasing number of countries, it is at the top of the policy and research agenda ranking among the possible ways to redress the glaring lack of relevant academic and vocational qualifications and to promote the development of competences and certification procedures which recognise different types of learning, including formal, non-formal and informal learning. The aim of the book is therefore to present and share experience, expertise and lessons in such a way that enables its effective and immediate use across the full spectrum of country contexts, whether in the developing or developed world. It examines the importance of meeting institutional and political requirements that give genuine value to the recognition of non-formal and informal learning; it shows why recognition is important and clarifies its usefulness and the role it serves in education, working life and voluntary work; it emphasises the importance of the coordination, interests, motivations, trust and acceptance by all stakeholders. The volume is also premised on an understanding of a learning society, in which all social and cultural groups, irrespective of gender, race, social class, ethnicity, mental health difficulties are entitled to quality learning throughout their lives. Overall the thrust is to see the importance of recognising non-formal and informal learning as part of the larger movement for re-directing education and training for change. This change is one that builds on an equitable society and economy and on sustainable development principles and values such as respect for others, respect for difference and diversity, exploration and dialogue.

Adapting Technology for School Improvement - David W. Chapman 2004

Physics Education - Hans Ernst Fischer 2022-01-12

This book offers a comprehensive overview of the theoretical background and practice of physics teaching and learning and assists in the integration of highly interesting topics into physics lessons. Researchers in the field, including experienced educators, discuss basic theories, the methods and some contents of physics teaching and learning, highlighting new and traditional perspectives on physics instruction. A major aim is to explain how physics can be taught and learned effectively and in a manner enjoyable for both the teacher and the student. Close attention is paid to aspects such as teacher competences and requirements, lesson structure, and the use of experiments in physics lessons. The roles of mathematical and physical modeling, multiple representations, instructional explanations, and digital media in physics teaching are all examined. Quantitative and qualitative research on science education in schools is discussed, as quality assessment of physics instruction. The book is of great value to researchers involved in the teaching and learning of physics, to those training physics teachers, and to pre-service and practising physics teachers.

Inklusion im Sekundarbereich - Ewald Kiel 2014-11-20

Die Inklusionsdebatte ist über weite Strecken geprägt von bildungspolitisch-programmatischen Statements. Die Frage nach den Umsetzungen und nach den Herausforderungen eines inklusiven Bildungssystems wird bislang selten gestellt. Der in der Diskussion vielleicht am meisten vernachlässigte Bereich ist die Sekundarstufe. Die notwendigen Veränderungen von Werthaltungen, didaktischen Konzepten, Formen der Schulentwicklung und -organisation oder neue Formen der Weiterbildung stehen nicht im Fokus des Diskurses. Das Buch wird diesen bislang kaum behandelten Schauplatz der Inklusion vor einem möglichst breiten Themenhorizont erschließen.
