Water Follies - Robert Jerome Glennon
2004-01-14

Wired for Love - Stan Tatkin 2012-01-02
"What the heck is my partner thinking?" is a common refrain in romantic relationships, and with good reason. Every person is wired for love differently, with different habits, needs, and reactions to conflict. The good news is that most people's minds work in predictable ways and

respond well to security, attachment, and rituals, making it possible to actually neurologically prime the brain for greater love and fewer conflicts. *Wired for Love* is a complete insider's guide to understanding a partner's brain and promoting love and trust within a romantic relationship. Readers learn ten scientific principles they can use to avoid triggering fear and panic in their partners, manage their partners' emotional reactions when they do become upset, and recognize when the brain's threat response is hindering their ability to act in a loving way. By learning to use simple gestures and words, readers can learn to put out emotional fires and help their partners feel more safe and secure. The no-fault view of conflict in this book encourages readers to move past a "warring brain" mentality and toward a more cooperative "loving brain" understanding of the relationship. Based in the sound science of neurobiology, attachment theory, and emotion regulation research, this book is essential

reading for couples and others interested in understanding the complex dynamics at work behind love and trust in intimate relationships. *Tell Me Honey... 2000 Questions for Couples* - Vikram Chandiramani 2010-04-01

The Routledge Handbook of Hospitality Studies -

Conrad Lashley 2016-11-10

In recent years there has been a growing interest in the study of hospitality as a social phenomenon. This interest has tended to arrive from two communities. The first comprises hospitality academics interested in exploring the wider meanings of hospitality as a way of better understanding guest and host relations and its implications for commercial settings. The second comprises social scientists using hosts and guests as a metaphor for understanding the relationship between host communities and guests as people from outside the community - migrants, asylum seekers and illegal immigrants. The Routledge Handbook of Hospitality Studies encourages both the study of hospitality as a human phenomenon and the study for hospitality as an industrial activity embracing the service of food, drink and accommodation. Developed from specifically commissioned original contributions from recognised authors in the field, it is the most up-to-date and definitive resource on the

subject. The volume is divided into four parts: the first looks at ways of seeing hospitality from an array of social science disciplines; the second highlights the experiences of hospitality from different guest perspectives; the third explores the need to be hospitable through various time periods and social structures, and across the globe; while the final section deals with the notions of sustainability and hospitality. This handbook is interdisciplinary in coverage and is also international in scope through authorship and content. The 'state-of-the-art' orientation of the book is achieved through a critical view of current debates and controversies in the field as well as future research issues and trends. It is designed to be a benchmark for any future assessment of the field and its development. This handbook offers the reader a comprehensive synthesis of this discipline, conveying the latest thinking, issues and research. It will be an invaluable resource for all those with an interest in hospitality, encouraging dialogue across

disciplinary boundaries and areas of study.

Western Gardener & Beekeeper - 1924

Preach the Word - Myles MacBean 2019-11-11
How should we help equip the church leaders of Africa today? There remains a well-documented lack of theologically sound, Bible-centric preaching in Sub-Saharan Africa. The majority of sermons are preached by untrained (or undertrained) church leaders. Following a practical theology praxis, this book develops a conceptual framework for the evaluation of existing “alternative” approaches to “grassroots” preacher training. It also proposes broad principles for effective preacher training, and offers a practical solution. The 20th century had seen the Christian church in Africa grow 36 fold to 360 million. This amazing growth is arguably “the largest religious change in human history in such a short period.” It has shifted the focus of Christianity from North to South. This rapid growth is - debatably - considered by some

missiologists and theologians to have resulted in an African church “a mile wide and an inch deep.” That is, a church of great size but lacking in spiritual depth. The rapid growth has led to insufficient numbers of trained leaders being available to oversee their congregations. Most leaders are unpaid. Untrained or undertrained leaders have an inadequate knowledge of scripture, and lack understanding of its interpretation. They also lack the skills they need to communicate its truths. Even so, they preach up to 90% of the sermons in rural Africa. Despite a tremendous hunger for training among many of those preachers, “traditional” college based theological education cannot keep up with the demand for trained pastors and preachers in an affordable or culturally appropriate manner.
