Rapid Review of Clinical Medicine for MRCP Part 1

- Rashmi Kaushal 2019-07-17

Following the super-success of their MRCP Part 2 volume, the authors adapt their special teaching skills to the needs of MRCP Part 1 and similar exams

in internal medicine. The book consists of 360 Best of 5' multiple choice questions (1,800 clinical decision) reflecting the latest exam format. It covers all areas of clinical medicine needed by ex **MRCP Part 2 Examination** - Ashley Bond 2017-11-22 Finding the time to revise effectively is one of the greatest challenges that modern MRCP candidates face. This unique book by a recent successful candidate provides precisely what many have needed but been unable to find until now: the distilled essential knowledge required to pass the MRCP Part 2 exam. This book provides candidates with a concise and well-directed approach to fast and efficient revision, supplying comprehensive coverage of the MRCP syllabus and the key points of each topic. It stands apart from other MRCP revision resources in supplying both concise text and the essential lists needed to pass the Part 2 exam.

Cases for PACES - Stephen Hoole 2010-02-02

Cases for PACES provides a concise study aid to Part II of the MRCP examination; the Practical Assessment of Clinical Examination Skills or PACES. The new edition of this very popular study guide has been completely updated, and now includes scenarios for Station 5, introduced in October 2009. Featuring a 'case study' format that matches the style of the exam, it includes all the essential information - perfect for on-the-ward revision and study. Written by authors who remember their own PACES examination, their experience in learning and teaching PACES is condensed to provide exactly what you need to know to pass. With its informal style, Cases for PACES is also ideal for self-directed learning in groups, and will help you hone your clinical skills and boost your confidence in the run-up to the examination. Essential Revision Notes for Cardiology KBA - Ali Khavandi
2014-04-10

As the first revision text aimed specifically at the Knowledge-Based Assessment, Essential Revision Notes for Cardiology KBA is the cornerstone of your revision for this new and compulsory examination. Each chapter exactly maps the core cardiology training curriculum, giving measurable assurance that you are getting the information you need to pass. Each chapter is written by a senior cardiology trainee in collaboration with a senior consultant who has expertise in that specific field, ensuring that the content is both authoritative and accessible. Drawing on the latest guidelines and documents, the concise, bullet-pointed layout allows easy access to and digestion of the key points you'll need during revision. Numerous tables, boxes and figures make this the ideal accompaniment to retaining the large and varied amount of information needed to pass the

examination.

Basic Medical Sciences for MRCP - P. Easterbrook 1994

Basic Medical Sciences for MRCP - Philippa Easterbrook 1999-01-01

Recognition of the importance of the basic sciences in medicine has led to a growing emphasis on such questions in both the MRCP part 1 and 2 examinations. This book was written in response to the need for a revision guide of the core basic sciences, namely genetics, microbiology, immunology, anatomy, physiology, biochemistry, statistics, and epidemiology. In this second edition the immunology and genetics chapters have been updated along with a section on molecular medicine.

Basic Science for the MRCS - Andrew T. Raftery 2012

This book is a concise revision guide to the core basic sciences - anatomy, physiology and pathology - which comprise the essential knowledge required by the trainee entering the specialty of

surgery. It has been written in a style to facilitate easy learning of the essential facts, with indications of both their clinical relevance and importance. This book concentrates on those topics which tend to be recurring examination themes for initial surgical training. It will be an invaluable resource for the basic surgical trainee studying for the Intercollegiate MRCS examination, as well as proving useful for those in higher surgical training and for the surgically inclined, well-motivated student. The book covers in one volume all the essentials of the basic sciences - anatomy, physiology and pathology - to aid the candidate for the MRCS examination. In covering the applied basic science the books explains the application and clinical relevance of the three sciences The text is written in an appropriate 'bullet-point' style to allow easy reading and rapid exam preparation The contents concentrate on the recurring common themes of the examination, thus helping

direct appropriate learning and focussing on the specific important areas of knowledge. The book is illustrated with line drawings which are clearly annotated to aid learning. In this Second Edition, chapters have been updated and sections expanded to cover topics which are particularly relevant to examinations. The microbiology chapter has been rewritten, and the section on skin healing has also been extensively rewritten to include a section on burns, skin grafting and the anatomy of flaps. Each chapter has new OSCE scenario questions added to bring together the basic science and its clinical application in OSCE examinations.

Medicine for MRCP - Rupa Bessant 2020-08-17

Medicine for MRCP provides a comprehensive review of the material that you need to pass the MRCP Parts 1 and 2 written papers. The twenty-seven chapters mapped out to the RCP syllabus, cover all areas from molecular medicine and genetics, through to

medical law and ethics. Written by specialist contributors and educational experts, the content is carefully crafted to build your understanding for both papers. Each chapter begins with the basic science required for Part 1, before covering clinical medicine for Part 1, Part 2 and the PACES examinations. To ensure effective revision, material is presented in short sections with bullet lists, tables, and boxes. Over 150 drawings and photos illustrate key principles and clinical topics making them easier to retain. References to evidence-based protocols and directions to further reading allow for deeper understanding. Candidates can review their progress via the 180 end-of chapter self-assessment questions. Drawing on the authors' expertise, *Medicine for MRCP* is the ideal companion for the MRCP as well as a useful reference guide for practicing medical doctors.

Washington Manual® General Internal Medicine Consult - Thomas Ciesielski 2016-12-15

Concise, portable, and user-friendly, The Washington Manual® General Internal Medicine Consult, Third Edition, provides quick access to the essential information needed when performing an inpatient consult. Chapters are organized around presenting symptom (e.g., approach to nausea, approach to low back pain), allowing quick look-up of differential diagnosis and management. Ideal for medical students, residents, and practitioners, the manual is also useful as a quick-reference guide for practicing hospitalists.

Essential Revision Notes in Paediatrics for the MRCPCH - R. M. Beattie 2012

The definitive guide to revision for the MRCPCH examination. 25 Chapters covering all areas the MRCPCH syllabus in note format. Concise presentation of information, with hints and tips. Vital facts presented in an attractive user-friendly format. Diagrams, pie charts, lists, illustrations and bullet points to aid learning.

PACES for the MRCP - Tim

Hall 2013-09-17

The 3rd edition of PACES for the MRCP has been fully revised and updated throughout to retain its pole position as the textbook to accompany core medical training (CMT) and prepare candidates for success in the Practical Assessment of Clinical Examination Skills and a future specialty career. Features Fully revised for the new Station 5 and completely updated throughout. Promotes understanding and deeper learning of modern medicine applicable to PACES and the specialist registrar. Emphasis on clinical assessment - history-taking, examination and communication skills - equipping candidates with appropriate differential diagnoses from which to develop the right diagnosis. Encourages candidates to question why a diagnosis has arisen and consider its consequences. For example, 'Heat failure' is a not a diagnosis until a candidate has considered the differential diagnoses of breathlessness

and decided why heart failure is most likely, and then considered its cause (not always ischaemic heart disease), its presentation (acute, chronic, left or right ventricular or both) and, most importantly, the effects of it and its treatments on a patient's life. This 3rd edition of PACES for the MRCP continues to provide fully revised, up-to-date, evidence-based coverage of investigations and treatments. Whilst the emphasis of PACES is on clinical skills, candidates who understand when, for example, a patient with rheumatoid arthritis might benefit from a biologic agent and how this will influence inflammatory disease, is better equipped for success. A one-volume text giving candidates complete preparation for the PACES exam within one portable volume 250 cases organised into the 5 stations of the PACES exam - respiratory and abdominal system, history taking, cardiovascular and nervous system, communication and ethics and

skin, locomotion, eyes and endocrine systems Engaging question-and-answer approach at the end of each case - excellent preparation for the exam Boxed tips highlight vital information - helps identify what is most important to remember Produced in full colour throughout Colour coding for each station Many more illustrations added - now over 300 clinical photographs and line drawings in colour Many more cases added, bringing the number up to 250 - 50 per station History-taking and communication skills stations now revised so that they exactly mimic the requirements of the exam

Mastering Medicine - Archith Bloor 2020-10-31

This textbook is an essential revision aid for trainees preparing for Membership of the Royal College of Physicians (MRCP) examinations. Divided into 30 sections, the book begins with discussion on common symptoms and presentations, then emergency presentations. The following sections provide in depth

coverage of the diagnosis and management of diseases and disorders in different body systems. The text concludes with chapters on geriatric medicine, genetics, epidemiology, clinical pharmacology, and ECG Interpretation. Treatment protocols are current and inline with the latest international guidelines. Each chapter is highly illustrated with images and figures, as well as teaching notes and easy-to-memorise lists to assist revision. Topics frequently encountered in examinations and key points are also highlighted. Key points
