Surrealism Beyond Borders - Stephanie
D'Alessandro 2021-10-04
Surrealism Beyond Borders challenges
conventional narratives of a revolutionary
artistic, literary, and philosophical movement.
Tracing Surrealism's influence and legacy from
the 1920s to the late 1970s in places as

geographically diverse as Colombia,
Czechoslovakia, Egypt, Japan, Korea, Mexico,
the Philippines, Romania, Syria, Thailand, and
Turkey, this publication includes more than 300
works of art in a variety of media by well-known
figures—including Dalí, Ernst, Kahlo, Magritte,
and Miró—as well as numerous artists who are
less widely known. Contributions from more
than forty distinguished international scholars
explore the network of Surrealist exchange and
collaboration, artists' responses to the
challenges of social and political unrest, and the
experience of displacement and exile in the
twentieth century. The multiple narratives
addressed in this expansive book move beyond
the borders of history, geography, and
nationality to provocatively redraw the map of
Surrealism.

Global Trends 2030 - National Intelligence Council (U.S.) 2012

This report is intended to stimulate thinking

about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories over the next 15 years. As with the NIC's previous Global Trends reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of Global Trends 2030. NIC leadership engaged with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report.

Global Trends 2030 - Office of the Director of
National Intelligence Council 2017-03-11
This publication covers global megatrends for

the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council's series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. NIC 2012-001. Several innovations are included in Global Trends 2030, including: a review of the four previous Global Trends reports, input from academic and other experts around the world, coverage of disruptive technologies, and a chapter on the potential trajectories for the US role in the international system and the possible the impact on future international relations.

Table of Contents: Introduction 1 Megatrends 6
Individual Empowerment 8 Poverty Reduction 8

On the State - Pierre Bourdieu 2018-05-18

What is the nature of the modern state? How did

it come into being and what are the characteristics of this distinctive field of power that has come to play such a central role in the shaping of all spheres of social, political and economic life? In this major work the great sociologist Pierre Bourdieu addresses these fundamental questions. Modifying Max Weber's famous definition, Bourdieu defines the state in terms of the monopoly of legitimate physical and symbolic violence, where the monopoly of symbolic violence is the condition for the possession and exercise of physical violence. The state can be reduced neither to an apparatus of power in the service of dominant groups nor to a neutral site where conflicting interests are played out: rather, it constitutes the form of collective belief that structures the whole of social life. The 'collective fiction' of the state is a fiction with very real effects - is at the same time the product of all struggles between different interests, what is at stake in these struggles, and their very foundation. While the question of the

state runs through the whole of Bourdieu's work, it was never the subject of a book designed to offer a unified theory. The lecture course presented here, to which Bourdieu devoted three years of his teaching at the Collège de France, fills this gap and provides the key that brings together the whole of his research in this field. This text also shows 'another Bourdieu', both more concrete and more pedagogic in that he presents his thinking in the process of its development. While revealing the illusions of 'state thought' designed to maintain belief in government being oriented in principle to the common good, he shows himself equally critical of an 'anti-institutional mood' that is all too ready to reduce the construction of the bureaucratic apparatus to the function of maintaining social order. At a time when financial crisis is facilitating the hasty dismantling of public services, with little regard for any notion of popular sovereignty, this book offers the critical instruments needed for a more

lucid understanding of the wellsprings of domination.

Starting to Teach Latin - Steven Hunt
2016-02-11

This handbook for teachers provides both

practical, up-to-date guidance and a theoretical overview on a number of key topics in Latin teaching. Using a wealth of interviews, observations and pupil transcripts, Steven Hunt title utilizes case-study evidence of excellent practice in teaching and learning from a wide variety of institutions: from outreach programmes, community schools and academies in the UK, to New York Charter Schools, KIP schools and schools in Eastern Seaboard states in the USA. Offering practical advice on topics such as essay writing, teaching controversial topics including women, slavery, ethnicity and social hierarchy, making use of primary sources and using ICT to advance language skills, the book also engages with broader questions of approach and theory. These include a survey of the three main approaches to Latin teaching: grammar-translation, communicative and reading approaches; explanation of cognitive and social approaches to learning; and analysis of the differences between intrinsic and extrinsic

motivation. Moreover, traditional arguments about the value and purpose of learning Latin at school level are re-examined in the light of current educational thinking and government policy-making. This book is invaluable for trainees, newly qualified teachers and more experienced practitioners looking for practical ideas and strategies to motivate and engage learners of Latin. A companion website www.startingtoteachlatin.org is under construction and will contain a range of resources and information for teachers. *Catalog of Copyright Entries* - Library of Congress.
