Walking with Comrades - Arundhati Roy 2011-05-15

'The terse, typewritten note slipped under my door in a sealed envelope confirmed my appointment with "India's single biggest internal security challenge". I'd been waiting for months to hear from them...' In early 2010, Arundhati Roy travelled into the forests of Central India, homeland to millions of indigenous people, dreamland to some of the world's biggest mining corporations. The result is this powerful and unprecedented report from the heart of an unfolding revolution.

Delusional Politics - Hardeep Singh Puri 2019-01-31

'Looking out of my corner fourth-floor office with a full-frontal view, across First Avenue of the headquarters of the United Nations with the flags of the 193 member states fluttering majestically, I was reminded ever so often of what Bertrand Russell said: 'The trouble with the world is that the stupid are cocksure and the intelligent are full of doubt.' Many democratically elected leaders of the twenty-first century have displayed streaks of recklessness, megalomania, bizarre self-obsession and political views that are difficult to characterize. This book studies the actions of these contemporary political leaders and covers Brexit, the election of Donald Trump, the rise of the BJP under Prime Minister Narendra Modi and decision-making with respect to global governance, terrorism and trade. It brings to light the fact that at the heart of delusional politics is perhaps the delusional politician.

Housing Microfinance - Franck Daphnis 2004-01-01

Annotation This is the first book to give a comprehensive overview of the new field of housing microfinance practice worldwide. The expert contributors provide guidance to practitioners and policymakers on what works best, and look at the applicability of developing world experience of housing microfinance in the United States. The book takes experience from the separate fields of housing policy and microfinance and explores what each can learn from the other. The contributors review the important issues for microfinance institutions which are considering expanding into housing, or providers of conventional housing loans who seek to offer products for poor clients who lack collateral or a regular salary income. Although there are differences between the low-income housing market in the United States and in developing countries, the book explores lessons from international experience that can be applied domestically. With lessons for both housing policymakers and housing microfinance practitioners, this will be a crucial book in putting the new field of housing microfinance on the map.

Private Security Trends, 1970 to 2000 - William Clay Cunningham 1990

This report describes the growth and changes in the private security industry between 1970 and 1990, discusses emerging and continuing issues and trends in private security and its relationships with public law enforcement, and recommends measure and research to improve cooperation between private security and law enforcement. Data came from a review of previous research, individual and focus group interviews, and an analysis of market data. Results indicated that the

increased use of locks, security lighting, and other private and public security measures reflect a growing fear of crime, even while statistics show stable or declining crime rates. In addition, the frequency and cost of business crime are increasing. Additional crime problems include breaches of business ethics, drug abuse, computer crime, and terrorism. The primary responsibility for protective measures has also been shifting from public law enforcement to private security, indicating the need for greater cooperation between the public and private sectors. In addition, contract security companies are growing, while proprietary security organizations are decreasing in number. Major issues include the privatization of police support tasks, false alarms, police moonlighting, and the growing use of private adjudication.

Review of the Department of Energy's Plans for Disposal of Surplus Plutonium in the Waste Isolation Pilot Plant - National Academies of Sciences, Engineering, and Medicine 2020-06-01

In 2018, the National Academies of Sciences, Engineering, and Medicine issued an Interim Report evaluating the general viability of the U.S. Department of Energy's National Nuclear Security Administration's (DOE-NNSA's) conceptual plans for disposing of 34 metric tons (MT) of surplus plutonium in the Waste Isolation Pilot Plant (WIPP), a deep geologic repository near Carlsbad, New Mexico. It provided a preliminary assessment of the general viability of DOE-NNSA's conceptual plans, focused on some of the barriers to their implementation. This final report addresses the remaining issues and echoes the recommendations from the interim study.

Disaster Management in India: Challenges and Strategies - Dr. R. K. Dave 2018-02-21

This book - "Disaster Management in India: Challenges and Strategies" - provides a practical and realistic understanding of the evolving status of disaster management in India. The book discusses techno-legal systems for disaster management and their real-life effectiveness based upon the author's own professional experience as well as available literature including studies, reviews and audits reports. A case study of the 2001 Bhuj Earthquake conducted by the author is at the nucleus of the book and provides a clear understanding on how interdependent sub-systems (social, organisational, infrastructure) can fail during sever incidents, and the consequences thereof. Lack of resources, lack of coordination, and poor communication are endemic to severely damaged disaster environments like the 2001 Bhuj earthquake and are very commonly seen across the world. What is more important for the future is that new methods are being evolved that overcome the potential risks posed by such initial conditions for improving organizational performance. Lessons from the 2001 Bhuj earthquake highlighted in this book are still relevant and provide directions for well-designed future interventions. The book critically examines performance status of disaster management in the post DM Act 2005 period and identifies many relevant issues and challenges - including development of effective institutions for disaster risk management. At the end, the book proposes intervention strategies for strengthening and improving disaster management systems keeping in mind the latest developments and best-practices suited to Indian conditions. Drawing on the author's decades of experience both in the domains of disaster management and technology, the book provides tips on - Emergency Operations Center design and development; Media integration into DM, emergency Resources Management systems development and Crowd management.

Rethinking Public Institutions in India - Devesh Kapur 2018-02-16
While a growing private sector and a vibrant civil society can help compensate for the shortcomings of India's public sector, the state is—and will remain—indispensable in delivering basic governance. In *Rethinking Public Institutions in India*, distinguished political and economic thinkers critically assess a diverse array of India's core federal institutions, from the Supreme Court and Parliament to the Election Commission and the civil services. Relying on interdisciplinary approaches and decades of practitioner experience, this volume interrogates the capacity of India's public sector to navigate the far-reaching transformations the country is experiencing. An insightful introduction to the functioning of Indian democracy, it offers a roadmap for carrying out fundamental reforms that will be necessary for India to build a reinvigorated state for the twenty-first century.

Civil Service Management and Administrative Systems in South Asia - Ishtiaq Jamil 2018-06-25

This book examines public administration in South Asia in the context of rapid changes and modernization of administrative traditions, thoughts, and practices. The existing literature has, however, not given adequate attention to these developments, at least in a single volume. The book describes both the shared administrative traditions of Bhutan, Bangladesh, China, India, the Maldives, Nepal, Pakistan, and Sri Lanka, and how far they have adapted their administrative systems to respond

to contemporary administrative and governance challenges. The book studies how national civil service reforms have been carried out in each member state of South Asia and how the national civil service acts and different regulations are being implemented, as well as what are the critical factors associated with the implementation of national civil service acts and reform measures in the region.

WHO Guidelines on Hand Hygiene in Health Care - World Health Organization 2009

The WHO Guidelines on Hand Hygiene in Health Care provide health-care workers (HCWs), hospital administrators and health authorities with a thorough review of evidence on hand hygiene in health care and specific recommendations to improve practices and reduce transmission of pathogenic microorganisms to patients and HCWs. The present Guidelines are intended to be implemented in any situation in which health care is delivered either to a patient or to a specific group in a population. Therefore, this concept applies to all settings where health care is permanently or occasionally performed, such as home care by birth attendants. Definitions of health-care settings are proposed in Appendix 1. These Guidelines and the associated WHO Multimodal Hand Hygiene Improvement Strategy and an Implementation Toolkit (<http://www.who.int/gpsc/en/>) are designed to offer health-care facilities in Member States a conceptual framework and practical tools for the application of recommendations in practice at the bedside. While ensuring consistency with the Guidelines recommendations, individual adaptation according to local regulations, settings, needs, and resources is desirable. This extensive review includes in one document sufficient technical information to support training materials and help plan implementation strategies. The document comprises six parts.

Energy Balance and Obesity - Isabelle Romieu 2018-01-12

Understanding the relationship between energy balance and obesity is essential to develop effective prevention programs and policies. The International Agency for Research on Cancer convened a Working Group of world-leading experts in December 2015 to review the evidence regarding energy balance and obesity, with a focus on low- and middle-income countries, and to consider the following scientific questions: (i) Are the drivers of the obesity epidemic related only to energy excess and/or do specific foods or nutrients play a major role in this epidemic? (ii) What are the factors that modulate these associations? (iii) Which types of data and/or studies will further improve our understanding? This book provides summaries of the evidence from the literature as well as the Working Group's conclusions and recommendations to tackle the global epidemic of obesity.
