Due to the important role Internet cafes play in facilitating access to information, there is a need for their systems to have well-installed software in order to ensure smooth service delivery. Security and Software for Cybercafes provides relevant theoretical frameworks and current empirical research findings on the security measures and software necessary for cybercafes, offering information technology professionals, scholars, researchers, and educators detailed knowledge and understanding of this innovative and leading-edge issue, both in industrialized and developing countries.

Information Security and Auditing in the Digital Age - Amjad Umar 2003-12  
This book provides a recent and relevant

coverage based on a systematic approach. Especially suitable for practitioners and managers, the book has also been classroom tested in IS/IT courses on security. It presents a systematic approach to build total systems solutions that combine policies, procedures, risk analysis, threat assessment through attack trees, honeypots, audits, and commercially available security packages to secure the modern IT assets (applications, databases, hosts, middleware services and platforms) as well as the paths (the wireless plus wired network) to these assets. After covering the security management and technology principles, the book shows how these principles can be used to protect the digital enterprise assets. The emphasis is on modern issues such as e-commerce, e-business and mobile application security; wireless security that includes security of Wi-Fi LANs, cellular networks, satellites, wireless home networks, wireless middleware, and mobile application servers; semantic Web

security with a discussion of XML security; Web Services security, SAML (Security Assertion Markup Language) and .NET security; integration of control and audit concepts in establishing a secure environment. Numerous real-life examples and a single case study that is developed throughout the book highlight a case-oriented approach. Complete instructor materials (PowerPoint slides, course outline, project assignments) to support an academic or industrial course are provided. Additional details can be found at the author website ([www.amjadumar.com](http://www.amjadumar.com))

### **Design of Industrial Information Systems -**

Thomas Boucher 2010-07-26

Design of Industrial Information Systems presents a body of knowledge applicable to many aspects of industrial and manufacturing systems. New software systems, such as Enterprise Resource Planning, and new hardware technologies, such as RFID, have made it possible to integrate what were separate

IT databases and operations into one system to realize the greatest possible operational efficiencies. This text provides a background in, and an introduction to, the relevant information technologies and shows how they are used to model and implement integrated IT systems. With the growth of courses in information technology offered in industrial engineering and engineering management programs, the authors have written this book to show how such computer-based knowledge systems are designed and used in modern manufacturing and industrial companies. Introduces Data Modeling and Functional Architecture Design, with a focus on integration for overall system design Encompasses hands-on approach, employing many in-chapter exercises and end-of-chapter problem sets with case studies in manufacturing and service industries Shows the reader how Information Systems can be integrated into a wider E-business/Web-Enabled Database business model Offers applications in Enterprise

Resource Planning (ERP) and Manufacturing Execution Systems (MES)  
*Strategic Recreation Management* - Jay Shivers  
2011-12-16

Strategic Recreation Management is a comprehensive and up-to-date introduction to the fundamental principles, managerial techniques and practices in the public administration of recreational services. It covers every key facet of public management as it concerns recreational service, including organizational, operational, planning, developmental, and managerial procedures, as well as examining all the contextual factors that influence the delivery of recreation, such as political pressures, economics, social considerations, physical resources, and citizens' perception of the field and its performance. Each chapter offers illustrative case studies from the real world of recreation management, with chapters sequenced to represent the typical day-to-day challenges and issues in recreation

service. Authors Jay Shivers and Joseph Halper have many years' experience of working in the recreational sector, as educators and practitioners, and the result is a textbook that

provides the perfect foundation for any degree-level course in recreation management, as well as being an indispensable reference for all professionals working in recreation service.
