Reading Greek: Teacher's Notes - Joint Association of Classical Teachers 1986-08-07
The Teachers' Notes are intended to help teachers by offering suggestions for tactics to adopt.

Ceramicus Redivivus - John K. Papadopoulos
2003

This volume presents selected material

associated with potters' workshops and pottery production from some 14 Early Iron Age contexts northwest of the Athenian Acropolis that range in date from the Protogeometric through Archaic periods. Located in the area that was to become the Agora of Classical Athens, these deposits establish that the place was used for industrial activity until it was

formally transformed into the civic and commercial center of the city in the early 5th century B.C. The Early Iron Age potters' debris published in this volume sheds light on many aspects of pottery production, in prehistory as well as in the Classical and later periods. The material includes test-pieces, wasters and other production discards. There is also a reassessment of the evidence associated with the kiln underlying the later Tholos.

A Companion to Science, Technology, and Medicine in Ancient Greece and Rome, 2

Volume Set - Georgia L. Irby 2019-12-05

A Companion to Science, Technology, and Medicine in Ancient Greece and Rome brings a fresh perspective to the study of these disciplines in the ancient world, with 60 chapters examining these topics from a variety of critical and technical perspectives. Athletics in Ancient Athens - Donald G. Kyle 1993-01-01

Sidelights on Greek Antiquity - Konstantinos Kalogeropoulos 2021-03-08

Nineteen contributions by eminent scholars cover topics in Greek Epigraphy, Ancient History, Archaeology, and the Historiography of

Archaeology. The section on Epigraphy and Ancient History has a particular focus on Attica, whereas material from Eretria, Delphi, the Argolid, Aetolia, Macedonia, Samothrace, and Aphrodisias widens the picture. The section on Archaeology discusses cultural variation as well as matters of cult, myth, and style, especially in Attica, from the Chalcolithic to the Roman period. The final section on the History of Archaeology reviews the early history of archaeological research at sites such as Piraeus, Rhamnous, Marathon, Oropos, Pylos, and Eretria, based on unpublished archival sources as well as on preliminary sketches and architectural drawings by 19th century artists.

The Early Iron Age - John K. Papadopoulos
2018-05-15

This volume, the first of two dealing with the Early Iron Age deposits from the Athenian Agora, publishes the tombs from the end of the Bronze Age through the transition from the Middle Geometric to Late Geometric period. An

introduction deals with the layout of the four cemeteries of the period, the topographical ramifications, periodization, and a synthesis of Athens in the Early Iron Age. Individual chapters offer a complete catalogue of the tombs and their contents, a full analysis of the burial customs and funerary rites, and analyses of the pottery and other small finds. Maria A. Liston presents the human skeletal material, Deborah Ruscillo presents the faunal remains, and Sara Strack contributes to the pottery typology and catalogue. In an appendix, Eirini Dimitriadou provides an overview of the locations of burial activity in the wider city.

Warfare in Bronze Age Society - Christian Horn
2018-04-26

Warfare in Bronze Age Society takes a fresh look at warfare and its role in reshaping Bronze Age society. The Bronze Age represents the global emergence of a militarized society with a martial culture, materialized in a package of new efficient weapons that remained in use for

millennia to come. Warfare became institutionalized and professionalized during the Bronze Age, and a new class of warriors made their appearance. Evidence for this development is reflected in the ostentatious display of weapons in burials and hoards, and in iconography, from rock art to palace frescoes. These new manifestations of martial culture constructed the warrior as a 'Hero' and warfare as 'Heroic'. The case studies, written by an international team of scholars, discuss these and other new aspects of Bronze Age warfare. Moreover, the essays show that warriors also facilitated mobility and innovation as new weapons would have quickly spread from the Mediterranean to northern Europe.

Death in Late Bronze Age Greece - Joanne M. A. Murphy 2020-01-06

"Late Bronze Age tombs in Greece and their attendant mortuary practices have been a topic of scholarly debate for over a century, dominated by the idea of a monolithic culture

with the same developmental trajectories throughout the region. This book contributes to that body of scholarship by exploring both the level of variety and of similarity that we see in the practices at each site and thereby highlights the differences between communities that otherwise look very similar. By bringing together an international group of scholars working on tombs and cemeteries on mainland Greece, Crete, and in the Dodecanese we are afforded a unique view of the development and diversity of these communities. The papers provide a penetrative analysis of the related issues by discussing tombs connected with sites ranging in size from palaces to towns to villages and in date from the start to the end of the Late Bronze Age. This book contextualizes the mortuary studies in recent debates on diversity at the main palatial and secondary sites and between the economic and political strategies and practices throughout Greece. The papers in the volume illustrate the pervasive connection between the mortuary

sphere and society through the creation and expression of cultural narratives, and draw attention to the social tensions played out in the mortuary arena"--

Aegean Painting in the Bronze Age - Sara Anderson Immerwahr 1990

Aegean Painting in the Bronze Age is intended as a handbook for the art historian and archaeologist, with a full catalogue of examples (arranged according to site), critical discussion of the problems of chronology, a comprehensive bibliography, maps, drawings of details, and more than 100 photographic plates, 23 in color. This is the only book to give a synthesis of painting and pictorial art from its beginnings in Prepalatial Crete to the collapse of Bronze Age civilization in the Aegean. Immerwahr traces the development of Aegean painting from its origins in Crete through its spread to the Cycladic islands and to the Greek mainland, where it gave rise to the specific Mycenaean style. She studies primarily wall painting but refers also to

painting on pottery and the pictorial art of seal engraving. The question of foreign influence from Egypt and Mesopotamia is discussed in connection with the origins of Minoan painting, and the new frescoes from Akrotiri on Thera are used to supplement the much more fragmentary paintings from Sir Arthur Evans's excavations at Knossos. Immerwahr also explores the interrelationship of the Minoan Cretans, the Cycladic islanders with their Minoanized enclaves on Thera and Melos, and the early Greek Mycenaean mainlanders.

Industrial Religion - Susan Rotroff 2014-01-31
This study focuses on the "saucer pyres," a series of 70 deposits excavated in the residential and industrial areas bordering the Athenian Agora. Each consisted of a shallow pit, its floor sometimes marked by heavy burning, with a votive deposit of pottery and fragments of burnt bone, ash, and charcoal. Most of the pots were miniatures (including the eponymous saucers) but a few larger vessels were found, along with

offerings associated with funerary cult. The deposits represent a largely Athenian phenomenon, with few parallels elsewhere. When first found in the 1930s, the deposits were interpreted as baby burials. Recent zooarchaeological analysis of the bones, however, reveals that they are the remains of sheep and goats, and that the deposits were sacrificial rather than funerary. The present study investigates the nature of those sacrifices, taking into account the contents of the pyres, their spatial distribution, and their relationship to buildings around the Agora and elsewhere. In light of a strong correlation between pyres and industrial activity, the author argues that the pyres document workplace rituals designed to protect artisans and their enterprises.

Tumulus as Sema - Olivier Henry 2016-04-11

Tumuli were the most widespread form of monumental tombs in the ancient world. Their impact on landscape, their allurements as well as their symbolic reference to a glorious past can

still be felt today. The need of supra-regional and cross-disciplinary examination of this unique phenomenon led to the organisation of an international conference in Istanbul in 2009. The proceedings of *Tumuli Istanbul* revolve around the question of the symbolic significance of burial mounds in the 1st millennium BC in the Eastern Mediterranean and Black-Sea regions, also providing further insight into their Kurgan neighbours from Eurasia.

Bronze Age Eleusis and the Origins of the Eleusinian Mysteries - Michael B. Cosmopoulos 2015-06-30

This book provides a synthesis of the archaeology of Eleusis during the Bronze Age, reconstructing the origins and early development of the Eleusinian Mysteries.

The Agora Bone Well - Maria A. Liston

2019-01-22

Even though Dorothy Thompson excavated the Agora Bone Well in 1938, the well and its remarkable finds have never been fully studied until now. Located outside the northwest corner of the Athenian Agora and dating to the second quarter of the 2nd century B.C., the well contained the remains of roughly 460 newborn infants, as well as a few older individuals. Also found in the well were the bones of over 150 dogs and an assortment of other animals, plus various artifacts, including an intriguing herm (treated here by Andrew Stewart) and an ivory chape. In addition to a thorough examination of the contents of the well, the authors provide a thoughtful analysis of the neighborhood in which the well was located and carefully compare the deposit with similar accumulations found elsewhere in the Mediterranean. The product of

close cooperation between archaeological, palaeoanthropological, and faunal scholars, this interdisciplinary work will be of interest to a large audience across a variety of fields.

Early Athens - Eirini M. Dimitriadou 2019-03-31

This volume is one of the most important works on ancient Athens in the last fifty years. The focus is on the early city, from the end of the Bronze Age--ca. 1200 BCE--to the Archaic period, when Athens became the largest city of the Classical period, only to be destroyed by the Persians in 480/479 BCE. From a systematic study of all the excavation reports and surveys in central Athens, the author has synthesized a detailed diachronic overview of the city from the Submycenaean period through the Archaic. It is a treasure trove of information for archaeologists who work in this period. Of great value as well are the detailed maps included, which present features of ancient settlements and cemeteries, the repositories of the human physical record. Over eighty additional large-

scale, interactive maps are available online to complement the book.

Athletics in Ancient Athens - D.G. Kyle

2018-07-17

This book presents new insights into the relationship between governors and provincial subjects in the Later Roman Empire. Discussion of provincial expectations and perception, the continuous dialogue, interdependence and reciprocity leads to a better understanding of Late Roman provincial administration.

Kratos & Krater: Reconstructing an Athenian Protohistory - Barbara Bohlen

2017-06-30

Athenian governance and culture are reconstructed from the Bronze Age into the historical era based on traditions, archaeological contexts and remains, foremost the formal commensal and libation krater.

The Book of Acts in Its Graeco-Roman Setting - David W. J. Gill 1994-05

The Book of Acts in Its Graeco-Roman Setting

locates the Book of Acts within various regional and cultural settings in the eastern Mediterranean. These studies draw on recent archaeological fieldwork and epigraphic discoveries to describe the key cities and provinces within the Roman Empire. The relevant societal aspects of these regions, such as the Roman legal system, Roman religion, and the problem of transport and travel, all help contextualize the book of Acts.

Early Christianity in Athens, Attica, and Adjacent Areas - Cilliers Breytenbach 2022-11-14

This volume focuses on the rise and expansion of Christianity in Athens, Attica, and adjacent areas, from the Pauline mission until the closing of the philosophical schools under Justinian I. It takes into account all relevant literary, epigraphical, and archaeological evidence.

Inscriptions from the Athenian Agora -

Benjamin Dean Meritt 1966

Many types of written records are found in the Agora, and this booklet presents a sample of the

more than 10,000 inventoried inscriptions written on stone. The texts illustrated include diplomatic agreements, commemorative plaques for athletic victories, records of court judgements, boundary stones identifying different buildings, and fragmentary inscriptions featuring names (over 30,000 individual Athenians are now recorded).

The Cambridge Companion to Ancient Athens - Jenifer Neils 2021-01-31

Named for a goddess, epicenter of the first democracy, birthplace of tragic and comic theatre, locus of the major philosophical schools, artistically in the vanguard for centuries, ancient Athens looms large in contemporary study of the ancient world. This Companion is a comprehensive introduction the city, its topography and monuments, inhabitants and cultural institutions, religious rituals and politics. Chapters link the religious, cultural, and political institutions of Athens to the physical locales in which they took place. Discussion of

the urban plan, with its streets, gates, walls, and public and private buildings, provides readers with a thorough understanding of how the city operated and what people saw, heard, smelled, and tasted as they flowed through it. Drawing on the latest scholarship, as well as excavation discoveries at the Agora, sanctuaries, and cemeteries, the Companion explores how the city was planned, how it functioned, and how it was transformed from a democratic polis into a Roman city.

Tonathenethenathlon - Jenifer Neils 2003

This "Athenian Agora Picture Book" provides a general introduction to the Greater Panathenaia, the week-long religious and civic festival held in ancient Athens every four years, in honour of the city's patron goddess Athena.

Tombs, Burials, and Commemoration in Corinth's Northern Cemetery - Kathleen W. Slane 2017

This volume publishes the results of the rescue excavations along the terrace north of Ancient

Corinth, and examines the evidence for changing burial practices in the Greek city, the Roman colony, and a Christian town.

The Cambridge Companion to Ancient Athens - Jenifer Neils 2021-02-18

This book is a comprehensive introduction to ancient Athens, its topography, monuments, inhabitants, cultural institutions, religious rituals, and politics. Drawing from the newest scholarship on the city, this volume examines how the city was planned, how it functioned, and how it was transformed from a democratic polis into a Roman urbs.

A Companion to Archaic Greece - Kurt A. Raaflaub 2012-12-26

A systematic survey of archaic Greek society and culture which introduces the reader to a wide range of new approaches to the period. The first comprehensive and accessible survey of developments in the study of archaic Greece Places Greek society of c.750-480 BCE in its chronological and geographical context Gives

equal emphasis to established topics such as tyranny and political reform and newer subjects like gender and ethnicity Combines accounts of historical developments with regional surveys of archaeological evidence and in-depth treatments of selected themes Explores the impact of Eastern and other non-Greek cultures in the development of Greece Uses archaeological and literary evidence to reconstruct broad patterns of social and cultural development

Garden Lore of Ancient Athens - Dorothy Burr Thompson 1982

In the spring, the ground of the Agora archaeological park is covered in poppies and daisies while poplars and oaks shade many of the pathways. Some of these plants are wild and some were deliberately introduced to Athens in classical times. This booklet presents evidence for ancient horticulture in the Agora (for example, structured antique gardens were uncovered around the Temple of Hephaistos). Its color plates also provide a useful guide to

identifying modern Greek vegetation.

Ancient Athenian Building Methods - John McK
Camp 1984

While this booklet is illustrated solely with materials from the Athenian Agora, it also provides a concise introduction to building styles and techniques that will be useful to anyone interested in ancient Greek architecture. From financing to tools, and from mason's marks to the clamps that held blocks together, no detail is omitted in this well-illustrated text. The different parts of monumental buildings, from the foundations to the tile roofs, are all discussed with clear drawings to indicate how the whole was constructed.

Tombs, Burials, and Commemoration in Corinth's Northern Cemetery - Kathleen Warner
Slane 2017-05-31

Rescue excavations were carried out along the terrace north of Ancient Corinth by Henry Robinson, the director of the Corinth Excavations, and the American School of

Classical Studies at Athens on behalf of the Greek Archaeological Service, in 1961 and 1962. They revealed 70 tile graves, limestone sarcophagi, and cremation burials (the last are rare in Corinth before the Julian colony), and seven chamber tombs (also rare before the Roman period). The burials ranged in date from the 5th century B.C. to the 6th century A.D., and about 240 skeletons were preserved for study. This volume publishes the results of these excavations and examines the evidence for changing burial practices in the Greek city, Roman colony, and Christian town. Documented are single graves and deposits, the Robinson "Painted Tomb," two more hypogea, and four built chamber tombs. Ethne Barnes describes the human skeletal remains, and David Reese discusses the animal bones found in the North Terrace tombs. The author further explores the architecture of the chamber tombs as well as cemeteries, burial practices, and funeral customs in ancient Corinth. One appendix

addresses a Roman chamber tomb at nearby Hexamilia, excavated in 1937; the second, by David Jordan, the lead tablets from a chamber tomb and its well. Concordances, grave index numbers, Corinth inventory numbers, and indexes follow. This study will be of interest to classicists, historians of several periods, and scholars studying early Christianity.

Charis - Anne Proctor Chapin 2004

This tribute to Professor Sara Immerwahr comprises a short biography, her full bibliography, and twenty articles written by fellow scholars celebrating her contributions to the field of Bronze Age painting and art history, as well as her encouragement and generous support of her students and colleagues over many years.

Amphoras and the Ancient Wine Trade - Virginia Grace 1979

Although this booklet is based on broken pottery found during the excavation of the Agora, the author ranges far beyond the confines of Athens

in her discussion of the purpose and significance of different amphora types. Amphoras were used in the ancient world to transport various different types of products, including wine and oil. The author shows how chronological variations in shape and the geographical clues offered by stamped handles make amphoras a fascinating source of economic information. The booklet illustrates many different forms of amphora, all set into context by the well-written text.

The Middle Ages in the Athenian Agora - Alison Frantz 1961

The story of the Agora did not end in A.D. 267, when the Herulians invaded the city. From ornate Early Christian carving to the colorful green and brown glazed pottery that distinguished the city, this booklet shows how medieval Athens was a lively, bustling town with a rich artistic tradition. Finds and architecture from the private houses that covered over the remains of the classical city are discussed, and

the book ends with a survey of the Church of the Holy Apostles, the 11th-century A. D. church that stands at the southeast corner of the Agora.

Early Burials from the Agora Cemeteries -

Sara Anderson Immerwahr 1973

Before the creation of the Agora as a civic center in the 7th century B.C., the region northwest of the Acropolis was a vast cemetery. Over 150 ancient burial places have been found by excavators, and a few of the more remarkable are described here. These range from a wealthy Mycenaean chamber tomb, filled with the vases and jewelry of a rich noblewoman, to the poignant pithos burial of an infant from around 725 B.C., accompanied by eight tiny vases. As well as describing the assemblages found, the author discusses the symbolism of funeral rites and the information about social status and identity that burials reveal.

Funerary Epigrams of Ancient Greece - Marta González González 2019-03-07

Taking a wide selection of Greek funerary

epigrams from the 6th to 4th centuries BC, this volume considers their historical and chronological contexts to draw out information about the society that created them. Using both Hansen's corpus of epigrams and wider examples, it gives priority to those cases where the whole monument ensemble is preserved, both text and image, enabling a much better understanding of the significance of the texts. A thematic structure within a broader chronological framework provides a valuable lens on the epigrams, allowing readers to compare particular types across the time period. After introducing the funerary landscape in which the selected epigrams fit, González briefly considers the literary form of epigrams as a foil for the rest of the book. The remaining chapters focus on epitaphs of individuals in the most significant stages of life, where gender differences are most marked: themes include untimely death, women and wives, friendship, piety and non-kin love. All epigrams are offered

in Greek, followed by an English translation. The analysis focuses on the literary aspects of the epigrams, as well as on the information they provide about both society and religion of ancient Greece.

The Symposium in Context - Kathleen M. Lynch 2011

This book presents the first well-preserved set of sympotic pottery which served a Late Archaic house in the Athenian Agora. The deposit contains household and fine-ware pottery, nearly all the figured pieces of which are forms associated with communal drinking. Since it comes from a single house, the pottery also reflects purchasing patterns and thematic preferences of the homeowner. The multifaceted approach adopted in this book shows that meaning and use are inherently related, and that through archaeology one can restore a context of use for a class of objects frequently studied in isolation.

The Athenian Agora - John McK. Camp II

2010-02-28

This definitive guide to the archaeological remains in the civic and commercial center of ancient Athens is an essential companion to the interested visitor, as well as to students of the topography of the classical city. A large-scale map provides an overview of the site, keyed to descriptions and plans of every monument still visible from the majestic Temple of Hephaistos to the utilitarian Great Drain. The fifth edition retains many of the elements that made the earlier editions so popular, but also takes full account of new discoveries and recent scholarship. It is intended for visitors touring the site, and is arranged topographically, monument by monument. Also included are an overview of the historical development of the site and a history of the excavations.

The Stoa of Attalos II in Athens - Homer A. Thompson 1992

Named after its donor, the King of Pergamon, the Stoa of Attalos was originally built around

150 B.C. Between 1953 and 1956 this long, columned, marble building was rebuilt by the American School of Classical Studies to store and display finds from the Agora excavations. Using original materials and techniques, the modern builders learned much about the construction and purpose of the stoa, a ubiquitous classical building type. This heavily illustrated account presents some of their findings.

An Archaeology of Ancestors - Carla Maria Antonaccio 1995

In this fresh consideration of the origins of the ancient Greeks' ideas and practices concerning their own past, Carla M. Antonaccio demonstrates that hero cult and ancestor cult persisted, throughout the Iron Age, long before epic poetry's heroic narratives were widely disseminated. Although it was not until the dissolution of Iron Age societies that epic poetry and organized hero cult developed to aid claims

to legitimacy, practices such as visiting tombs to make offerings were common, and contradict the usual picture of Iron Age religious conservatism.

Burial and Ancient Society - Ian Morris 1987
This study of the changing relationships between burial rituals and social structure in Early Iron Age Greece will be required reading for all archaeologists working with burial evidence, in whatever period. This book differs from many topical studies of state formation in that unique and particular developments are given as much weight as those factors which are common to all early states. The ancient literary evidence and the relevant historical and anthropological comparisons are extensively drawn on in an attempt to explain the transition to the city-state, a development which was to have decisive effects for the subsequent development of European society.

The Athenian Kerameikos - Ursula Knigge 1991
