The Handbook for Embedded Formative Assessment - Solution Tree
2017-11-09

Educational achievement carries more importance than ever in the 21st century. According to academic research, teacher quality plays the most vital role in raising achievement among all K&12 students, so improving teacher quality will lead to both greater student outcomes and greater prosperity for individuals and the whole of society. The Handbook for Embedded Formative Assessment makes the case that incorporating formative assessment into daily classroom practice raises teacher quality and enhances student learning to help all parties meet the evolving demands of society. As a companion to Embedded Formative Assessment, Second Edition (Wiliam, 2018), this book has one main purpose: to help teachers develop the practice of formative assessment in classrooms by providing tried-and-tested classroom formative assessment techniques and giving evidence that shows how these techniques positively impact student achievement. Grades K&12 teachers can choose from these techniques, try them out in the classroom, and modify them to meet their specific needs. However, The Handbook for Embedded Formative Assessment can also act as a stand-alone book, sharing highlights from Embedded Formative Assessment as necessary before leading straight to the how-tos of classroom formative

assessment.

The Soviet T-54 Main Battle Tank - James Kinnear 2018-11-29

The menacing silhouette of the T-54 tank prowling down streets of Eastern European capitals or roaring across fields in massive exercises remains one of the most enduring images of Soviet power in the early years of the Cold War. Its sleek and unmistakable shape was a warning to any nation that wanted to stand against the USSR. Yet all of this masked a flawed, outdated design, and when T-54s began to clash with the Western armoured vehicles in proxy wars in Southeast Asia and the Middle East, they were found to be on the losing side of many of the battles. Containing over 500 stunning contemporary and modern photographs, and written by two experts on Soviet armour, this

authoritative book tells the complete story of the T-54, one of the most widely produced tanks of all time, including many previously unheard of variants.

Test Anxiety - Moshe Zeidner 2006-04-11

Examination stress and test anxiety are pervasive problems in modern society. As the information age continues to evolve, test scores will become even more important than they are today in evaluating applicants for demanding jobs and candidates for admission into highly competitive educational programs. Because test anxiety generally causes decrements in performance and undermines academic achievement, the development of effective therapeutic interventions for reducing its adverse effects will continue to be an important priority for counselors, psychologists, and educators. Alleviating test anxiety will also serve to counteract the diminished access to educational and occupational opportunities that is frequently experienced by test-anxious individuals. As its title promises, this volume provides a state-of-the-art evaluation of the nature, antecedents, correlates, and consequences of examination stress and test anxiety. Professor Zeidner's cogent and comprehensive analysis of the affective, cognitive, somatic, and behavioral manifestations of test anxiety are grounded in the extensive knowledge he has gained from his own research on the assessment and treatment of test anxiety. This work has also benefitted from the author's longstanding and productive collaboration with leading contributors to test anxiety theory and research, and his active participation in national and international conferences devoted to understanding test anxiety, including those convened by the Society for Test Anxiety Research (STAR).

Promise Me Forever - Paige Weaver 2015-12-27

From the highly acclaimed New York Times, USA Today, and international bestselling author, Paige Weaver, comes the epic conclusion of her fourth book, Promise Me Once... In the weak, there is strength. In despair, there is hope. My world was dark. Survival was tough. But the end of the world saved me. It taught me to love. To go on living. In its darkness, I found myself. In its bleakness, I found hope. I

wasn't the girl I used to be. I was stronger. I was with the man I loved. The cowboy with a quiet presence who took what he wanted, including me. He showed me love and gave me strength. He touched me and I was never the same. I didn't want to love him but I couldn't resist. I was his. But the world was trying to tear us apart. Love may save us or it may be our destruction. We may die for it or sacrifice everything to keep it. The choice will not be simple. Live or die. Love or lose. I was about to find out which one...

Worlds of Influence - United Nations 2021-05-31

For the last 20 years, the Innocenti Report Card series has led the way in comparing children's well-being across rich countries. Report Card 16 develops this further through a multi-level approach to show that children's well-being is influenced by children's own actions and relationships, by the networks and resources of their caregivers, and by public policies and the national context. This approach is aligned with the 1989 United Nations Convention on the Rights of the Child, in that it recognizes the responsibilities of governments, families and communities to help realize children's rights and promote their well-being.

Modern Architecture in Africa - Antoni S. Folkers 2019-07-22

This book offers unique insights into modern African architecture, influenced by modern European architecture, and at the same time a natural successor to existing site-specific and traditional architecture. It brings together the worlds of traditional site-specific architecture with the Modernist Project in Africa, which to date have only been considered in isolation. The book covers the four architectural disciplines: urban planning, building technology, building physics, and conservation. It includes an introduction with a historical outline and an analysis and comparison of a number of projects in various countries in Africa. On the basis of examples drawn from practice, the author documents and describes the hybrid architectural forms that have emerged from the confrontation and fusion with (pre)modern Western architecture and urban planning, and in so doing he also narrates the history of African architecture.

Topics in Audiovisual Translation - Pilar Orero 2004-10-20

The late twentieth-century transition from a paper-oriented to a media-oriented society has triggered the emergence of Audiovisual Translation as the most dynamic and fastest developing trend within Translation Studies. The growing interest in this area is a clear indication that this discipline is going to set the agenda for the theory, research, training and practice of translation in the twenty-first century. Even so, this remains a largely underdeveloped field and much needs to be done to put Screen Translation, Multimedia Translation or the wider implications of Audiovisual Translation on a par with other fields within Translation Studies. In this light, this collection of essays reflects not only the “state of the art” in the research and teaching of Audiovisual Translation, but

also the professionals’ experiences. The different contributions cover issues ranging from reflections on professional activities, to theory, the impact of ideology on Audiovisual Translation, and the practices of teaching and researching this new and challenging discipline. In expanding further the ground covered by the John Benjamins’ book (Multi)Media Translation (2001), this book seeks to provide readers with a deeper insight into some of the specific concepts, problems, aims and terminology of Audiovisual Translation, and, by this token, to make these specificities emerge from within the wider nexus of Translation Studies, Film Studies and Media Studies. In a quickly developing technical audiovisual world, Audiovisual Translation Studies is set to become the academic field that will address the complex cultural issues of a pervasively media-oriented society.
