Social Work in Europe - Charlotte Williams
2013-09-13

It is an acknowledged if not accepted fact that all European societies are being fundamentally transformed, and indeed perceptively unsettled, by increased migrations across nations and by the asserted presence of established minorities within their borders. The scale and speed at which these transformations have taken place have brought in their wake considerable social impacts and no small measure of fear and anxiety. Encounters with such diversity are part and parcel of the social work task, and learning how to negotiate them should be a de facto aspect of the training and continuous professional development of social workers and other social professions. However, the moral and political dimensions of the role, scope and

nature of the social work task in responding appropriately to these changed and changing realities are rather more contested. This volume addresses many dimensions of the response to issues of race and ethnicity in social work practice in Europe. It extends the debates on inter-cultural and race equality practice in social work through a stimulating and innovative collection of contributions. This book was originally published as a special issue of the European Journal of Social Work.

[Python for Probability, Statistics, and Machine Learning](#) - José Unpingco 2019-06-29

This book, fully updated for Python version 3.6+, covers the key ideas that link probability, statistics, and machine learning illustrated using Python modules in these areas. All the figures and numerical results are reproducible using the Python codes provided. The author develops key intuitions in machine learning by working

meaningful examples using multiple analytical methods and Python codes, thereby connecting theoretical concepts to concrete implementations. Detailed proofs for certain important results are also provided. Modern Python modules like Pandas, Sympy, Scikit-learn, Tensorflow, and Keras are applied to simulate and visualize important machine learning concepts like the bias/variance trade-off, cross-validation, and regularization. Many abstract mathematical ideas, such as convergence in probability theory, are developed and illustrated with numerical examples. This updated edition now includes the Fisher Exact Test and the Mann-Whitney-Wilcoxon Test. A new section on survival analysis has been included as well as substantial development of Generalized Linear Models. The new deep learning section for image processing includes an in-depth discussion of gradient descent methods that underpin all deep learning algorithms. As with the prior edition, there are

new and updated *Programming Tips* that illustrate effective Python modules and methods for scientific programming and machine learning. There are 445 run-able code blocks with corresponding outputs that have been tested for accuracy. Over 158 graphical visualizations (almost all generated using Python) illustrate the concepts that are developed both in code and in mathematics. We also discuss and use key Python modules such as Numpy, Scikit-learn, Sympy, Scipy, Lifelines, CvxPy, Theano, Matplotlib, Pandas, Tensorflow, Statsmodels, and Keras. This book is suitable for anyone with an undergraduate-level exposure to probability, statistics, or machine learning and with rudimentary knowledge of Python programming.

Biomimetic Microengineering - Hyun Jung Kim 2020-01-16

This book will examine the relevant biological subjects involved in biomimetic microengineering as well as the design and

implementation methods of such engineered microdevices. Physiological topics covered include regeneration of complex responses of our body on a cellular, tissue, organ, and inter-organ level. Technological concepts in cell and tissue engineering, stem cell biology, microbiology, biomechanics, materials science, micro- and nanotechnology, and synthetic biology are highlighted to increase understanding of the transdisciplinary methods used to create the more complex, robust biomimetic engineered models. The effectiveness of the new bioinspired microphysiological systems as replacements for existing in vitro or in vivo models is explained through sections that include the protocols to reconstitute three-dimensional (3D) structures, recapitulate physiological functions, and emulate the pathophysiology of human diseases. This book will also discuss how researchers can discover bridge technologies for disease modeling and personalized precision medicine.

Features Focuses on cutting edge technologies that enable manipulation of living systems in a spatiotemporal manner. Incorporates research on reverse engineering of complex microenvironmental factors in human diseases. Highlights technologies related to patient-specific personalized medicine and their potential uses. Written by chapter authors who are highly respected researchers in science and engineering. Includes extensive references at the end of each chapter to enhance further study. Hyun Jung Kim is an Assistant Professor in the Department of Biomedical Engineering at The University of Texas at Austin. After receiving his Ph.D. degree at Yonsei University in the Republic of Korea, he did extensive postdoctoral research at both the University of Chicago and the Wyss Institute at Harvard University. These efforts resulted in cutting-edge breakthroughs in synthetic microbial community research and organomimetic human Gut-on-a-Chip microsystem. His research on Gut-on-a-

Chip technology leads to the creation of a microfluidic device that mimics the physiology and pathology of the living human intestine. Since 2015, he has explored novel human host-microbiome ecosystems to discover the disease mechanism and new therapeutics in inflammatory bowel disease and colorectal cancers at UT Austin. In collaboration with clinicians, his lab is currently developing disease-oriented, patient-specific models for the advancement in pharmaceutical and clinical fields.

Spelling Through Phonics - Marlene J.
McCracken 2012-06

The first edition of *Spelling Through Phonics* was published in 1982. Since then, over 300,000 copies have been sold. This 30th Anniversary

Edition, is available in the same compact, easy-to-use format that teachers want. It contains: the McCrackens' original spelling instruction program an explanation of phonemic awareness and why children need to acquire it detailed instructions on how to teach spelling--easily, quickly, and efficiently methods to organize children's spelling practice within the school day reproducible spelling checklists for grades 1-3 This 30th Anniversary Edition is dedicated to the memory of The McCrackens' teaching, and honours their invaluable contributions to language arts across North America.

*The Multinational History of Strasbourg
Astronomical Observatory* - Andre HECK
2006-04-04

Strasbourg Astronomical Observatory is quite an interesting place for historians: several changes of nationality between France and Germany, high-profile scientists having been based there, big projects born or installed within its walls, and so on. Most of the documents circulating on

the history of the Observatory and on related matters have however been so far poorly referenced, if at all. This made necessary the compilation of a volume such as this one, offering fully-documented historical facts and references on the first decades of the Observatory history, authored by both French and German specialists. The experts contributing to this book have done their best to write in a way understandable to readers not necessarily hyperspecialized in astronomy nor in the details of European history. Several appendices conclude the book: lists of council members and of Observatory scientific personnel, as well as a compendium of the institutional publications until the year 2000. SBAs, EMQs & SAQs in SURGERY - Matthew Hanks 2019-06-01
'SBAs, EMQs & SAQs in SURGERY' provides a

broad range and style of questions, not only for medical students preparing for their final exams, but also for those clinicians preparing for their postgraduate exams. This book includes over 200 single best answer questions (SBAs), 400 extended matching questions (EMQs) and 100 short answer questions (SAQs), giving the reader a wide variety of topics to test their exam knowledge and technique. It is an invaluable educational resource for exam preparation and to help you succeed. Over 700 questions on the core medical subjects. • Compiled by a team of junior doctors with recent final exam and postgraduate specialty exam experience. • Overseen by experienced doctors to ensure relevance and accuracy. • The broad medical curriculum is covered in a succinct and consistent style. • Clear and concise answers are provided. • Easy accessible information to facilitate revision on the move. • Enables the reader to assess their knowledge and help identify gaps in their knowledge to target

revision. • The following main specialties are covered: - Upper gastrointestinal surgery; - Lower gastrointestinal surgery; - Vascular surgery; - Breast surgery; - Urology; - Neurosurgery; - Ear, nose and throat surgery; - Trauma & orthopaedics; - Fluids & electrolytes. Construction Safety - Rita Yi Man Li
2013-03-01

A close-to-ideal blend of suburb and city, speedy construction of towers of Babylon, the sparkling proportion of glass and steel buildings' facade at night showcase the wisdom of humans. They also witness the footsteps, sweats and tears of architects and engineers. Unfortunately, these signatures of human civilizations are swathed in towering figures of construction accidents.

Fretting about these on sites, different countries adopt different measures on sites. This book firstly sketches the construction accidents on sites, followed by a review on safety measures in some of the developing countries such as Bermuda, Egypt, Kuwait and China; as well as developed countries, for example, the United States, France and Singapore. It also highlights the enormous compensation costs with the courts' experiences in the United Kingdom and Hong Kong.

Thinking Security - Steven M. Bellovin
2015-12-03

If you're a security or network professional, you already know the "do's and don'ts": run AV software and firewalls, lock down your systems, use encryption, watch network traffic, follow best practices, hire expensive consultants . . . but it isn't working. You're at greater risk than ever, and even the world's most security-focused organizations are being victimized by massive attacks. In Thinking Security, author Steven M.

Bellovin provides a new way to think about security. As one of the world's most respected security experts, Bellovin helps you gain new clarity about what you're doing and why you're doing it. He helps you understand security as a systems problem, including the role of the all-important human element, and shows you how to match your countermeasures to actual threats. You'll learn how to move beyond last year's checklists at a time when technology is changing so rapidly. You'll also understand how to design security architectures that don't just prevent attacks wherever possible, but also deal with the consequences of failures. And, within the context of your coherent architecture, you'll learn how to decide when to invest in a new security product and when not to. Bellovin, co-author of the best-selling *Firewalls and Internet Security*, caught his first hackers in 1971. Drawing on his deep experience, he shares actionable, up-to-date guidance on issues ranging from SSO and federated authentication

to BYOD, virtualization, and cloud security. Perfect security is impossible. Nevertheless, it's possible to build and operate security systems far more effectively. *Thinking Security* will help you do just that.

The Winter Ghosts - Kate Mosse 2011-02-03

From the New York Times bestselling author of Sepulchre and Labyrinth-a compelling story of love, ghosts and remembrance. World War I robbed England and France of an entire generation of friends, lovers and futures. In Freddie Watson's case, the battlefields took his beloved brother and, at times, his peace of mind. In the winter of 1928, still seeking some kind of resolution, Freddie is travelling through the beautiful but forbidding French Pyrenees. During a snowstorm, his car spins off the mountain road. Freezing and dazed, he stumbles through the woods, emerging in a tiny village, where he finds an inn to wait out the blizzard. There he meets Fabrissa, a lovely young woman also mourning a lost generation. Over the course of one night, Fabrissa and Freddie share their stories. By the time dawn breaks, Freddie will have unearthed a tragic mystery that goes back through the centuries, and discovered his own role in the life of this old remote town. By turns thrilling, poignant, and haunting, this is a story

of two lives touched by war and transformed by courage.

The Atopia Chronicles - Matthew Mather

2014-01-07

Book 1 of the Atopia Series! In the near future, to escape the crush and clutter of a packed and polluted Earth, the world's elite flock to Atopia, an enormous corporate-owned artificial island in the Pacific Ocean. It is there that Dr. Patricia Killiam rushes to perfect the ultimate in virtual reality: a program to save the ravaged Earth from mankind's insatiable appetite for natural resources. A strong narrative with several distinct voices propels the listener through this brave new world, painting a powerful and compelling vision of a society that promises everyone salvation with passage to an addictive, escapist alternative reality."

Empire and Islam - David Gilmartin 1988

Arvo Pärt - Paul Hillier 1997-04-24

World-famous, Estonian-born composer Arvo P--

art is a unique voice in today's music.

From his own extensive experience of working with P--art, Paul Hillier here provides the first full-length study of the composer's music. -

;The music of the Estonian-born composer Arvo P--art is a unique and powerful voice in the contemporary world. Using a tonal idiom based on a mixture of scales and triads, P--art created a style that he calls 'tintinnabuli'.

Listening to it, one is reminded of the passionate tranquillity of some Russian icon, or of certain memorable scenes in the films of Andrei Tarkovsky. In this book, the first full-length study of P--art, Paul Hillier explores the tintinnabuli works in considerable depth. He also examines the music of P--art's earlier, somewhat neglected serial period, and charts the composer's steady evolution towards the 'abstract tonality' of his later years. In addition, a biographical chapter and discussion of topics such as Russian Orthodox spirituality, minimalism, and the influence of early music,

combine to make this a substantial introduction to P--auml--;rt's music. Hillier also draws on his own experience of working with the composer to offer thoughts on various performance issues. - *Merry Xmas Coloring Book For Adults 75+* - Sfaxino Books Publishing 2020-11-21

From Jailer to Jailed - Bernard B. Kerik

2015-03-31

The controversial New York City police commissioner and New York Times bestselling author of *The Lost Son* shares the story of his

fall from grace and the effects of his incarceration on his views of the American justice system. Bernard Kerik was New York City's police commissioner during the 9/11 attacks, and became an American hero as he led the NYPD through rescue and recovery efforts of the World Trade Center. His résumé as a public servant is long and storied, and includes receiving a Medal of Honor. In 2004, Kerik was nominated by George W. Bush to head the Department of Homeland Security. Now, he is a former Federal Prison Inmate known as #84888-054. Convicted of tax fraud and false statements in 2007, Kerik was sentenced to four years in federal prison. Now, for the first time, he talks candidly about what it was like on the inside: the torture of solitary confinement, the abuse of power, the mental and physical torment of being locked up in a cage, the powerlessness. With newfound perspective, Kerik makes a plea for change and illuminates why our punishment system doesn't always fit the crime. In this

extraordinary memoir, Kerik reveals his unprecedented view of the American penal system from both sides: as the jailer and the jailed. With astonishing candor, bravery, and insider's intelligence, Bernard Kerik shares his fall from grace to incarceration, and turns it into a genuine and uniquely insightful argument for criminal justice reform.

The Environment of Life - Colin Tudge 1988
Provides a wonderfully colorful survey of mankind's ecological saga. It tells the story of human evolution, describing man's complex role in adapting to and shaping his environment. The nontechnical language offers an open invitation to readers of all levels to follow the unfolding story from its beginning with an examination of the animal kingdom, to an overview of ecology and ecosystems, the rise of humanity and civilization, and the emergence of today's pressing concerns for a clean, safe environment. 480 illustrations.

[The Vagina Buffet](#) - Sharon Tierney 2012

SJ has seen thousands of vaginas. On her quest to normalise them, humor and calamity collide in this compilation of short stories and anecdotes about a girl who takes a break from her career in advertising to open a Brazilian waxing salon. It's not all about vaginas - it's about a girl trying to find her way through life, love, adventures, and whatever else the world could find to throw at her. This book is for anyone with a vagina, or anyone living with someone who has a vagina. It's not crude, but a lighter look at the female anatomy.

Big Bangs - Howard Goodall 2011-08-31
The dramatic story of five key turning points in a thousand years of Western music - discoveries that changed the course of history. Who first invented 'Doh Re Mi...'? What do we mean by "in tune"? Looking back down the corridor of a thousand years, Howard Goodall guides us through the stories of five seismic developments in the history of Western music. His "big bangs" may not be the ones we expect - some are

surprising and some are so obvious we overlook them - but all have had an extraordinary impact. Goodall starts with the invention of notation by an 11th-century Italian monk, which removed the creation of music from the hands of the players to the pens of the composers; moves on to the first opera; then to the invention of the piano, and ends with the story of the first recording made in history. Howard Goodall has the gift of making these complicated musical advances both clear and utterly fascinating. Racy and vivid in a narrative full of colourful characters and graphic illustrations of technical processes, he also gives a wonderful sense of the culture of trial and error and competition, be it in 11th-century Italy or 19th-century America, in which all progress takes place. Big Bangs opens a window on the crucial moments in our musical culture - discoveries that made possible everything from Bach to the Beatles - and tells us a riveting story of a millennium of endeavour.

Tiger Country - Nina Raine 2014-12-11

Nina Raine's *Tiger Country* is a hospital play that follows a tangle of doctors and nurses in a busy London hospital - from the award-winning author of *Tribes*. Professionalism and prejudice, turbulent staff romances, ambition and failure collide in this swirling, action-packed drama about an overburdened health service that we all depend on and the dedicated individuals that keep it going. 'Tiger country' is where animal instinct stirs and an irrefutable eye opens. Where we make eye contact with the unknown. *Tiger Country* was premiered at Hampstead Theatre in 2011 and, following its sell-out run, was revived there in 2014.

Hamlet - William Shakespeare 2021-02-09

Hamlet, probably composed between 1599 and 1601, takes place in Denmark and tells how

Prince Hamlet carries out his revenge on his uncle Claudius who murdered Hamlet's father, the king, and holds the usurped crown as well as nuptials with Gertrude, the mother of Hamlet. The play is vividly traced around insanity (both real and feigned) and the course from deep pain to inordinate anger. It also explores the themes of betrayal, revenge, incest and moral corruption.

Divorce Sucks - Mary Jo Eustace 2009-09-18

Hock the platinum. Take down the vacation photos. Cancel the joint checking account. There's no question . . . Divorce Sucks. And perhaps no one knows that better than author Mary Jo Eustace, whose ex-husband Dean McDermott married Tori Spelling a mere thirty days after their divorce was finalized. One part tell-all and one part guide to get readers on their feet after a bitter breakup, this hilarious addition to the bestselling Sucks series tells everything readers don't want to know about divorce - from what a phone call with a lawyer will cost; to how to handle your newer, younger replacement; to what Hollywood divorcees are actually thinking when they watch their ex walk the red carpet with a millionairess. Sometimes horrifying, sometimes gratifying, and never merciful, this book will give readers an inside look at one of today's most public divorces while reminding them - hey, it could always be worse.
