Over 200 extracts from books, pamphlets, diaries and letters are arranged under three main headings: female nature, character and behaviour; female roles and affairs; and 'feminisms.' Group Portrait with Lady - Heinrich Böll
2011-03-18

Cited by the Nobel Prize committee as the "crown" of Heinrich Böll's work, the gripping story of *Group Portrait With Lady* unspools like a suspenseful documentary. Via a series of tense interviews, an unnamed narrator uncovers the story—past and present—of one of Böll's most intriguing characters, the enigmatic Leni Pfeiffer, a struggling war widow. At the center of her struggle is her effort to prevent the demolition of her Cologne apartment building, a fight in which she is joined by a motley group of neighbors. Along with her illegitimate son, Lev, she becomes the nexus of a countercultural group rebelling against Germany's dehumanizing past under the Nazis ... and what looks to be an equally dehumanizing future under capitalism.

Themba - Lutz van Dijk 2011-10-31

A hard-hitting, and emotional story set in South Africa, following Themba and his dreams of becoming a famous footballer. Themba grows up dreaming of becoming a football star. One day he leaves the village and travels with his sister to the city in search of their mother. Life is a struggle and Themba has to grow up fast. A lucky break gives him the chance to train as a footballer and play professionally - but Themba has a secret - should he tell the truth about his

HIV and risk everything he's ever dreamed of? ~ Themba won an IBBY award - Best Book for Young People. Karin Chubb was Shortlisted for the Marsh Award for Children's Literature in Translation for Themba, a unique award celebrating the high quality and diversity of translated fiction for young readers. The book was also made into an award-winning film.

"Beautifully translated from the original ... it is a book full of hope and the more young people who read books like this and who come to understand how other young children live, the more this hope will spread." Books, Teens and Magazines "Themba reminds me of my own childhood and youth in a township close to a small village in the Transvaal in South Africa: Like him I wanted to escape poverty, like him I had the hope that our world will be a just world one day - and like him I loved my mother who was working at the time as a maid for a white family. To be very honest: in soccer Themba seems to be simply better than I was."

Archbishop Desmond Tutu "READ OF THE MONTH" *Pride* magazine "...an inspirational coming of age drama about a young South African boy's escape from poverty and the pursuit of a dream." *Spling* online "It's a rags to riches story - a story of hope, of dreaming your dreams and achieving them, and it's also a story of friendship..." *The Sunday Independent* "It's a really engaging book, and because Aids is a serious issue, it made us want to carry on reading more about it." *Durning Library* teenage reading group "Beautifully translated from the original and it is an easy and straightforward read. However, the storyline is tough - poverty, AIDS and death haunt the pages of the book. The reader learns about the hardship of life for many ordinary South Africans (even after Mandela came to power) and the struggle for those families who have a family member suffering from AIDS. The problems they face do not lie solely in a lack of medication and good nutrition; it also lies in the ignorance of their neighbours and friends and a refusal of many to acknowledge the illness and help the ill. However this is not a depressing book - it is a book full of hope and the more young people who read books like this and who come to understand how other young children live, the more this hope will spread." Banksy - Ulrich Blanché 2016-01-18

About this Book / Bristol born Banksy is usually categorized as a Street Artist, although his art, in content and form, transcends a narrow understanding of this term. This publication primarily deals with Banksy as a contemporary Urban Artist and his relationship with consumer culture. It examines Banksy not only in light of his illicit work on the street, but also in regard to his gallery exhibitions. The study highlights representative works of his art, pieces which demonstrate his versatility, but also stand for different periods of his oeuvre. This book presents the first academic study of Banksy's art in English; with a history and discussion of the terms Graffiti, Street Art and Urban Art and a rich array of biographical information. It will be of interest to academics and the general public as well. About this Edition / Street Artist Banksy and former Young British artist Damien Hirst are two of the most popular representatives of British contemporary art. Situated in a triangle of art, consumerism and pop culture their work is among the most well-known. A systematic academic study of their artistic viewpoints and references to consumer culture has long been missing, and Ulrich Blanché is finally closing this gap: He examines Hirst's and Banksy's art against the background of the London art scene since 1980. Blanché points out connections to Duchamp, Warhol and Koons, and reflects on the role of the observer, the meaning of location and, especially, the references between art, consumer culture and marketing in their pieces. This two volume edition is the translated and expanded version of the authors dissertational thesis.

Motherhood and Representation - E. Ann Kaplan 2013-07-23

From novels of the nineteenth century to films of

the 1990s, American culture, abounds with images of white, middle-class mothers. In *Motherhood and Representation*, E. Ann Kaplan considers how the mother appears in three related spheres: the historical, in which she charts changing representations of the mother from 1830 to the postmodernist present; the psychoanalytic, which discusses theories of the mother from Freud to Lacan and the French Feminists; and the mother as she is figured in cultural representations: in literary and film texts such as *East Lynne*, *Marnie* and the *The Handmaid's Tale*, as well as in journalism and popular manuals on motherhood. Kaplan's analysis identifies two dominant paradigms of the mother as 'Angel' and 'Witch', and charts the contesting and often contradictory discourses of the mother in present-day America.

From Zoroastrian sky burials to wish-granting Bolivian skulls, she investigates the world's funerary customs and expands our sense of what it means to treat the dead with dignity. The Homosexuality of Men and Women - Magnus Hirschfeld 2000

One of the founders of the scientific study of sex, Magnus Hirschfeld (1868-1935) led the field with his pioneering objective examinations of homosexuality, tranvestism, and gender identity. "The Homosexuality of Men and Women" was designed to provide a unified, comprehensive description of homosexuality while ridding heterosexuals of gay prejudice and allowing homosexuals to confront their isolation and accept themselves. Opening with a definition and a detailed biological discussion of sexual orientation, including the childhood and adolescent phases, Hirschfeld addresses the physical, mental, and emotional life of homosexuals while explaining the inborn nature of homosexuality and bisexuality. In the second half of the book, Hirschfeld looks at sociology, community life, bonding, roles in society, history, persecution, victimisation, and the law. His documentation of gays in the military and the "new technology" of his day -- such as the telephone and aeroplanes and their affect on the lives of homosexuals -- offers farsighted observations that strongly parallel today's national debates and new developments.

Red Vienna - Charles S Baylis Professor of History Helmut Gruber 1991

From 1919 to 1934, the Socialist government in Vienna sought to create a comprehensive working-class culture, striving to provide a foretaste of the socialist utopia in the present. In Red Vienna, Gruber critically examines the impact of this experiment in all areas of life, from massive public housing projects and health and education programs to socialist parades, festivals, and sporting events designed to create a new working class. The Socialist program faced enormous obstacles, arising from the exaggerated expectations of the socialist leaders and their conventional cultural vision, from the resistance of workers, and from the competition of commercial and mass culture. Gruber then evaluates the limited and partial success of the Viennese model -- clearly the most comprehensive in the West and a democratic alternative to the Bolsheviks' experiment in Soviet Russia -- to pose general questions about attempts to fashion culture from above.

Mammography Screening - Peter Gotzsche 2021-06-29

'This book gives plenty of examples of ad hominem attacks, intimidation, slander, threats of litigation, deception, dishonesty, lies and other violations of good scientific practice. For some years I kept a folder labeled Dishonesty in breast cancer screening on top of my filing cabinet, storing articles and letters to the editor that contained statements I knew were dishonest. Eventually I gave up on the idea of writing a paper about this collection, as the number of examples quickly exceeded what could be contained in a single article.' From the Introduction The most effective way to decrease women's risk of becoming a breast cancer patient is to avoid attending screening. Mammography screening is one of the greatest controversies in healthcare, and the extent to which some scientists have sacrificed sound scientific principles in order to arrive at politically acceptable results in their research is

extraordinary. In contrast, neutral observers increasingly find that the benefit has been much oversold and that the harms are much greater than previously believed. This groundbreaking book takes an evidence-based, critical look at the scientific disputes and the information provided to women by governments and cancer charities. It also explains why mammography screening is unlikely to be effective today. All health professionals and members of the public will find these revelations disturbingly illuminating. It will radically transform the way healthcare policy makers view mammography screening in the future. 'If Peter Gøtzsche did not exist, there would be a need to invent him ...It may still take time for the limitations and harms of screening to be properly acknowledged and for women to be enabled to make adequately informed decisions. When this happens, it will be almost entirely due to the intellectual rigour and determination of Peter Gøtzsche.' From the Foreword by Iona Heath, President, RCGP 'If you care about breast cancer, and we all should, you must read this book. Breast cancer is complex and we cannot afford to rely on the popular media, or on information from marketing campaigns from those who are invested in screening. We need to question and to understand. The story that Peter tells matters very much.' From the Foreword by Fran Visco, President, National Breast Cancer Coalition

Rational Diagnosis and Treatment - Peter Gøtzsche 2008-03-11

Now in its fourth edition, *Rational Diagnosis and Treatment: Evidence-Based Clinical Decision-Making* is a unique book to look at evidence-based medicine and the difficulty of applying evidence from group studies to individual patients. The book analyses the successive stages of the decision process and deals with topics such as the examination of the patient, the reliability of clinical data, the logic of diagnosis, the fallacies of uncontrolled therapeutic experience and the need for randomised clinical trials and meta-analyses. It is the main theme of the book that, whenever possible, clinical decisions must be based on the evidence from clinical research, but the authors also explain the pitfalls of such research and the problems involved in applying evidence from groups of patients to the individual patient. For this new edition, the sections on placebo and meta-analysis and on alternative medicine have been thoroughly updated, and there is more focus on insufficient reporting of harms of interventions. The sections on different research designs describe advantages and limitations, and the increased medicalisation and the effects of cancer screening on health people are noted. A section on academic freedom when clinicians collaborate with industry and ghost authors is added. This essential reference work integrates the science and statistical approach of evidence-based medicine with the art and humanism of medical practice; distinguishing between data, sets of data, knowledge and wisdom, and their application. Such an intellectually challenging book is ideal for both medical students and doctors who require theoretical and practical clinical skills to help ensure that they apply theory in practice.

Deconstructive Criticism - Vincent B. Leitch 1982-12

The ideal prelude to the study of deconstructive

theory for the as-yet-uninitiated reader. Leitch uses in-depth analyses, surveys of historical background, and helpful overviews to address

the questions posed by the major figures -- Saussure, Lacan, Levi-Strauss, Heidegger, Derrida, Barthes Foucault -- then penetrates and displays the subtle intricacies of their answers.
