Machine Tools for High Performance Machining - Norberto Lopez de Lacalle 2008-10-01

Machine tools are the main production factor for many industrial applications in many important sectors. Recent developments in new motion devices and numerical control have lead to considerable technological improvements in machine tools. The use of five-axis machining centers has also spread, resulting in reductions in set-up and lead times. As a consequence, feed rates, cutting speed and chip section increased, whilst accuracy and precision have improved as well. Additionally, new cutting tools have been developed, combining tough substrates, optimal geometries and wear resistant coatings. "Machine Tools for High Performance Machining" describes in depth several aspects of machine structures, machine elements and control, and

application. The basics, models and functions of each aspect are explained by experts from both academia and industry. Postgraduates, researchers and end users will all find this book an essential reference. AMTDA ... Directory - American Machine Tool Distributors' Association 1991

China International Import Expo: Shared Future In A New Era - Lei Zou 2020-09-22

China has been holding its annual China International Import Expo (CIIE), starting from 2018 in Shanghai. This is a significant move for China to actively open the Chinese market to the rest of the world as this supports trade liberalization and economic globalization This book systematically expounds the background and content of CIIE, and studies the opportunities that China's expansion of imports brings to its economy, enterprises, consumers and to that of other countries. It elaborates on how the CIIE facilitates countries and regions from different parts of the world to strengthen their economic cooperation and trade, and promote global trade and world economic growth. The book helps readers understand China's reform and opening-up, as well as the latest trends and policies of the country's expansion of import.
