Designing an Efficient Management System - Tanachart Raoprasert 2010-04-15

1. 1 Background of the Study: Ef?ciency in Cross-Cultural International Business Management Ef?cient business management is crucial in achieving corporate (national or int- national/multinational) goals such as higher value, comprehensiveness, corporate governance, etc. Ef?cient business management can be achieved by resolving agency problems existing among different stakeholders in corporations. In inter- tional business, agency problems may exist between managers, owners, staff, and other stakeholders who come from different cultures. Therefore, there is a need in designing ef?cient management of international

business by influencing the factors (the convergence factors) which cause differences in the interests and cultures of different stakeholders. International business refers to all commercial transactions between two or more nations. Because it comprises a large and growing portion of current world business practice, international business has received considerable attention in academic research (Daniels and Radebaugh 1998). International business differs in important ways from business conducted within national borders, and poses additional challenges to managers and investors in foreign countries (Mahoney et al. 1998). In this context, Black et al. (1999) state that effective management is increasingly recognized as a key determinant of success or failure, arguing that the success of international business in multinational companies depends most significantly on the quality of management systems (Stroh and Caligiuri 1998). As international business involves people from different cultures, every business function including managing a workforce, marketing output, and dealing with regulators, has the potential to involve cross-cultural problems (Zineldin 2007).

Challenges in City Management - Becky J. Starnes 2013-05-22

City management in developing countries is a quickly growing area in current public administration literature. However, little research material can be found regarding the management of cities. Demonstrating the issues in this field, Challenges in City Management: A Case Study Approach brings the sometimes dry theories and concepts of urban planning and management to life. The author uses case studies to demonstrate "who," "what," "why," and "how," dramatically increasing readers' ability to comprehend and apply the theories. Incorporating urban management and organizational management theories with actual practice, the author presents case studies based on observations made during her extensive experience. She offers multiple examples of common contemporary city topics ranging from personnel, policy-making, housing, homelessness, transportation, and budgeting. Each study describes and analyzes a scenario, identifying the economic and political factors as well as the often conflicting players and interest groups. The book provides enhanced understanding of the complex environment city

administrators work in, helping readers develop improved decision-making and problem-solving skills through the study of real issues city administrators have experienced. The case study methodology used supplies information that is immediately applicable to real-world situations, making it a resource that city administrators can use to improve their public administration and governance skills.

Critical Issues on Changing Dynamics in Employee Relations and Workforce Diversity - Yadav, Radha 2021-02-05

The past four decades have seen unprecedented social and economic changes that have demanded a transformation in existing employee relation practices. Shifts in demographics, gender diversity, and an increased mobility of the workforce across the board has changed the landscape in which organizations operate. Against this backdrop, attitudes towards work and careers have changed, leading to different expectations of the workplace. These and other contextual changes mean that existing strategies of employee relation may no longer be effective. *Critical Issues on Changing Dynamics in Employee Relations and Workforce Diversity* is a collection of pioneering research that addresses the challenges and issues pertaining to the changing dynamics of employee relations and provides additional support to better deal with critical issues related to people management. While highlighting topics including employee engagement, workplace culture, and diversified workforce, this book is ideally designed for human resource managers, managers, executives, researchers, business professionals, academicians, and students seeking current studies on critical matters in employee relation techniques and practices.

Fundamentals of Management - Stephen P. Robbins 2007

Management - Stephen P. Robbins 2020

"This course and this book are about management and managers. Managers are one thing that all organizations--no matter the size, kind, or location--need. And there's no doubt that the world managers face has changed, is changing, and will continue to change. The dynamic nature of today's organizations means both rewards and challenges for the individuals who will be managing those organizations. Management is a dynamic subject, and a textbook on it should reflect those changes to help prepare you to manage under the current conditions. We've written this 14th edition of *Management* to provide you with the best possible understanding of what it means to be a manager confronting change and to best prepare you for that reality. But not every student aspires to a career in management. And even if you do, you may be five or ten years away from reaching a managerial position. So you might rightly feel that taking a course in management now may be getting ahead of the game. We hear you. In response to these concerns, we've added new material to this book that is important and relevant to everyone working in an organization--manager and non-manager alike. Our "Workplace Confidential" pages identify, analyze, and offer suggestions for dealing with the major challenges that surveys indicate frustrate employees the most. You should find these pages valuable for helping you survive and thrive in your workplace. Surprisingly, this topic has rarely been addressed in business programs. Inclusion in an introductory management course appeared to us to be a logical place to introduce these challenges and to provide guidance in handling them"--

Intelligent Methods Systems and Applications in Computing, Communications and Control -

Simona Dzitac 2022-09-24

The book contains 37 papers presented at the ninth edition of the International Conference of Computers, Communications and Control—ICCCC-2022 held in Oradea and Băile Felix, Romania. A balanced selection of both methodological and application-oriented papers has been made to reflect several recent worldwide trends and results. The book is organized into five sections: a) integrated solutions in computer-based control, b) advanced control systems integrating computers and communications, c) soft computing including fuzzy system approach, d) decision making and support systems, and e) trustworthy and green design. The study of the papers contained in the book is useful for researchers, consultants, and postgraduate students in computer science and design, applied informatics, control systems, and industrial engineering. The book is also used as auxiliary material for student-level courses such as artificial intelligence, computational intelligence, and decision support systems.

The Truth About Managing People offers real solutions for the make-or-break problems faced by every manager. Readers will discover: how to overcome the true obstacles to teamwork; why too much communication can be as dangerous as too little; how to improve hiring and employee evaluations; how to heal layoff survivor sickness; even how to learn charisma. This isn't someone's opinion; it's a definitive, evidence-based guide to effective management: a set of bedrock principles to rely on throughout an entire

management career. The Rules of Management: They're surprisingly easy to learn and live by. Now, Richard Templar's brought them all together in one place. Templar covers everything from setting realistic targets to holding effective meetings; finding the right people to inspiring loyalty. Learn when and how to let your people think they know more than you (even if they don't) -- and recognize when they really do The first edition of The Rules of Management became a global phenomenon, topping bestseller charts around the world. This new, even better edition contains 10 brand new rules to take you further, faster. In Wired to Care, top business strategist Dev Patnaik tells the story of how organizations of all kinds prosper when they tap into a power each of us already has: empathy, the ability to reach outside of ourselves and connect with other people. When people inside a company develop a shared sense of what's going on in the world, they see new opportunities faster than their competitors. They have the courage to take a risk on something new. And they have the gut-level certitude to stick with an idea that doesn't take off right away. People are Wired to Care, and many of the world's best organizations are, too.

Foodservice Operations and Management: Concepts and Applications - Karen Eich Drummond 2021-08-16

Foodservice Operations & Management: Concepts and Applications is written for Nutrition and Dietetics students in undergraduate programs to provide the knowledge and learning activities required by ACEND's 2017 Standards in the following areas: • Management theories and business principles required to deliver programs and services. • Continuous quality management of food and nutrition services. • Food science and food systems, environmental sustainability, techniques of food preparation and development and modification and evaluation of recipes, menus, and food products acceptable to diverse populations. (ACEND Accreditation Standards for Nutrition and Dietetics Didactic Programs, 2017) The textbook can also be used to meet the competencies in Unit 3 (Food Systems Management) and Unit 5 (Leadership, Business, Management, and Organization) in the Future Education Model for both bachelor's and graduate degree programs.
