**Fueling Culture** - Jennifer Wenzel 2017-02-01

How has our relation to energy changed over time? What differences do particular energy sources make to human values, politics, and imagination? How have transitions from one energy source to another—from wood to coal, or from oil to solar to whatever comes next—transformed culture and society? What are the implications of uneven access to energy in the past, present, and future? Which concepts and theories clarify our relation to energy, and which just get in the way? *Fueling Culture* offers a compendium of keywords written by scholars and practitioners from around the world and across the humanities and social sciences. These

keywords offer new ways of thinking about energy as both the source and the limit of how we inhabit culture, with the aim of opening up new ways of understanding the seemingly irresolvable contradictions of dependence upon unsustainable energy forms. *Fueling Culture* brings together writing that is risk-taking and interdisciplinary, drawing on insights from literary and cultural studies, environmental history and ecocriticism, political economy and political ecology, postcolonial and globalization studies, and materialisms old and new.

Keywords in this volume include: Aboriginal, Accumulation, Addiction, Affect, America, Animal, Anthropocene, Architecture, Arctic, Automobile, Boom, Canada, Catastrophe, Change, Charcoal, China, Coal, Community, Corporation, Crisis, Dams, Demand, Detritus, Disaster, Ecology, Electricity, Embodiment, Ethics, Evolution, Exhaust, Fallout, Fiction, Fracking, Future, Gender, Green, Grids, Guilt, Identity, Image, Infrastructure, Innervation,

**Conservation Design for Subdivisions** - Randall G. Arendt 2012-09-26

In most communities, land use regulations are based on a limited model that allows for only one end result: the production of more and more suburbia, composed of endless subdivisions and shopping centers, that ultimately covers every bit of countryside with "improvements." Fortunately, sensible alternatives to this approach do exist, and methods of developing land while at the same time conserving natural areas are available. In *Conservation Design for Subdivisions*, Randall G. Arendt explores better ways of designing new residential developments than we have typically seen in our communities. He presents a practical handbook for residential developers, site designers, local officials, and landowners that explains how to implement new

ideas about land-use planning and environmental protection. Abundantly illustrated with site plans (many of them in color), floor plans, photographs, and renditions of houses and landscapes, it describes a series of simple and straightforward techniques that allows for land-conserving development. The author proposes a step-by-step approach to conserving natural areas by rearranging density on each development parcel as it is being planned so that only half (or less) of the buildable land is turned into houselots and streets. Homes are built in a less land-consumptive manner that allows the balance of property to be permanently protected and added to an interconnected network of green spaces and green corridors. Included in the volume are model zoning and subdivision ordinance provisions that can help citizens and local officials implement these innovative design ideas.

Tactics in Counterinsurgency - Department of the Army 2019-12-08

At its heart, a counterinsurgency is an armed struggle for the support of the population. Support can be achieved or lost through information engagement, strong representative government, access to goods and services, fear, or violence. This armed struggle also involves eliminating insurgents who threaten the safety and security of the population. However, military units alone cannot defeat an insurgency. Most of the work involves discovering and solving the population's underlying issues, that is, the root causes of their dissatisfaction. Tactics In Counterinsurgency provides the reader with the tactical leadership skills necessary to handle these diverse issues.

intertwined processes; and how these processes are not isolated in institutions but socially embedded.

*Lifestyle and Entertainment in Yangzhou* - Lucie B. Olivová 2009

The Chinese city of Yangzhou has been of great cultural significance for many centuries, despite its destruction by invaders in the 17th and 19th centuries. It was a site of virtual pilgrimage for aspiring members of the Chinese educated class during the Ming and Qing periods. Moreover, because it was one of the foremost commercial centres during the late imperial period, it was the place where the merchant and scholarly classes merged to set new standards of taste and to create a cultural milieu quite unlike that of other cities, even other major centres in the region. The luxurious elegance of its gardens and the eminence of its artistic traditions meant that Yangzhou set aesthetic standards for the entire realm for much of the late imperial age. Over the years, particular regional forms of art

and entertainment arose here, too, some surviving into the present time.

**California Style Manual** - Bernard Ernest Witkin 1977

**The Writing Revolution** - Judith C. Hochman 2017-08-07

Why you need a writing revolution in your classroom and how to lead it The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, The Writing Revolution can make a dramatic difference. And

the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities The Writing Revolution is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

**History of Concepts** - Iain Hampsher-Monk  
1998

Hoewel enorm invloedrijk in Duitstalig Europa, heeft de conceptuele geschiedschrijving (Begriffsgeschichte) tot nu toe weinig aandacht in het Engels gekregen. Dit genre van intellectuele geschiedschrijving verschilt van zowel de Franse geschiedschrijving van mentalités als de Engelstalige geschiedschrijving van verhandelingen door het concept. Aan de hand van praktische voorbeelden in de geschiedschrijving wordt deze vorm toegelicht door Bram Kempers, Eddy de Jongh en Rolf Reichardt.

**Tactics in Counterinsurgency - FM 3-24.2** -

Department of the Army 2014-05-04  
This field manual establishes doctrine (fundamental principles) for tactical counterinsurgency (COIN) operations at the company, battalion, and brigade level. It is based on lessons learned from historic counterinsurgencies and current

operations. This manual continues the efforts of FM 3-24, Counterinsurgency, in combining the historic approaches to COIN with the realities of today's operational environment (OE)—an environment modified by a population explosion, urbanization, globalization, technology, the spread of religious fundamentalism, resource demand, climate change and natural disasters, and proliferation of weapons of mass destruction. This manual is generic in its geographic focus and should be used with other doctrinal sources. • Chapter 1, Operational Environment of Counterinsurgency, defines insurgent and counterinsurgent while using the operational variables and mission variables to describe the OE. Finally, it stresses developing a culture capability for Soldiers and leaders. • Chapter 2, Foundations of Insurgency, categorizes insurgent groups by their components—elements, dynamics, and strategies and their manifestations—tactics, strengths, and vulnerabilities. • Chapter 3, Foundations of

Counterinsurgency, covers the seven lines of effort, tactical considerations, clear-hold-build operations, and counterinsurgency phases. • Chapter 4, Planning in Counterinsurgency, arguably the most important chapter, covers planning for tactical units during counterinsurgency operations. It also covers planning horizons and targeting. • Chapter 5, Offensive Operations in Counterinsurgency, addresses offensive techniques used by tactical units during counterinsurgency operations. • Chapter 6, Defensive Operations in Counterinsurgency, addresses defensive techniques used by tactical units during counterinsurgency operations. • Chapter 7, Stability Operations in Counterinsurgency, addresses stability techniques used by tactical units during counterinsurgency operations. • Chapter 8, Working with Host Nation Security Forces, covers the seven steps (MORTEAM) units use to train, advise, and partner with Host Nation security forces.

**The Borderlands of Southeast Asia** - National Defense University Press 2011-08

The contributors to this book emphasize a mix of heritage and history as the primary leitmotif for contemporary border rivalries and dynamics. Whether the region's 11 states want it or not, their bordered identity is falling into ever sharper definition-if only because of pressure from extraregional states. Chapters are organized by country to elicit a broad range of thought and approach as much as for the specific areas or nation-states examined in each chapter. This book aims to provide new ways of looking at the reality and illusion of bordered Southeast Asia. Edited by James Clad, Sean M. McDonald, and Bruce Vaughn, with contributions from: Zachary Abuza, Richard P. Cronin, David Lee, Rhoda Margesson, Dick K. Nanto, Patricia O'Brien, David Rosenberg, Carlyle A. Thayer, Michael Wood.

**Artificial Intelligence, China, Russia, and the Global Order** - Shazeda Ahmed 2019

"Artificial intelligence (AI) and big data promise to help reshape the global order. For decades, most political observers believed that liberal democracy offered the only plausible future pathways for big, industrially sophisticated countries to make their citizens rich. Now, by allowing governments to monitor, understand, and control their citizens far more effectively than ever before, AI offers a plausible way for big, economically advanced countries to make their citizens rich while maintaining control over them--the first since the end of the Cold War.

That may help fuel and shape renewed international competition between types of political regimes that are all becoming more "digital." Just as competition between liberal democratic, fascist, and communist social systems defined much of the twentieth century, how may the struggle between digital liberal democracy and digital authoritarianism define and shape the twenty-first? This work highlights several key areas where AI-related technologies have clear implications for globally integrated strategic planning and requirements development"--

**Dynamics of Contention** - Professor of Sociology Doug McAdam 2001-09-10

Over the past two decades the study of social movements, revolution, democratization and other forms of nonroutine, or "contentious politics," has flourished as never before. And yet theory and research on the topic remain highly fragmented. The first of these divisions reflects the long-standing view that various forms of

contention are indeed distinct and should be studied independent of others. A second traditional approach to the study of political contention denies the possibility of general theory, in deference to a thorough grounding in the temporal and spatial particulars of any given episode of contention. Finally, overlaid on these two divisions are stylized theoretical traditions--structuralist, culturalist, and rationalist--that have developed largely in isolation from one another.

**The Road to Results** - Linda G. Morra-Imas  
2009

'The Road to Results: Designing and Conducting Effective Development Evaluations' presents concepts and procedures for evaluation in a development context. It provides procedures and examples on how to set up a monitoring and evaluation system, how to conduct participatory evaluations and do social mapping, and how to construct a "rigorous" quasi-experimental design to answer an impact question. The text begins

with the context of development evaluation and how it arrived where it is today. It then discusses current issues driving development evaluation, such as the Millennium Development Goals and the move from simple project evaluations to the broader understandings of complex evaluations. The topics of implementing 'Results-based Measurement and Evaluation' and constructing a 'Theory of Change' are emphasized throughout the text. Next, the authors take the reader down 'the road to results,' presenting procedures for evaluating projects, programs, and policies by using a 'Design Matrix' to help map the process. This road includes: determining the overall approach, formulating questions, selecting designs, developing data collection instruments, choosing a sampling strategy, and planning data analysis for qualitative, quantitative, and mixed method evaluations. The book also includes discussions on conducting complex evaluations, how to manage evaluations, how to present results, and

ethical behavior--including principles, standards, and guidelines. The final chapter discusses the future of development evaluation. This comprehensive text is an essential tool for those involved in development evaluation.

**Commentary on the Second Geneva Convention** - 2017-12-21

The application and interpretation of the four Geneva Conventions of 1949 have developed significantly in the sixty years since the International Committee of the Red Cross (ICRC) first published its Commentaries on these important humanitarian treaties. To promote a better understanding of, and respect for, this body of law, the ICRC commissioned a comprehensive update of its original Commentaries, of which this is the second volume. Its preparation was coordinated by Jean-Marie Henckaerts, ICRC legal adviser and head of the project to update the Commentaries. The Second Convention is a key text of international humanitarian law. It contains the essential rules on the protection of the wounded, sick and shipwrecked at sea, those assigned to their care, and the vessels used for their treatment and evacuation. ### **Process Engineering and Industrial**

**Management** - Jean-Pierre Dal Pont 2013-03-04

Process Engineering, the science and art of transforming raw materials and energy into a vast array of commercial materials, was conceived at the end of the 19th Century. Its history in the role of the Process Industries has been quite honorable, and techniques and products have contributed to improve health, welfare and quality of life. Today, industrial

enterprises, which are still a major source of wealth, have to deal with new challenges in a global world. They need to reconsider their strategy taking into account environmental constraints, social requirements, profit, competition, and resource depletion. "Systems thinking" is a prerequisite from process development at the lab level to good project management. New manufacturing concepts have to be considered, taking into account LCA, supply chain management, recycling, plant flexibility, continuous development, process intensification and innovation. This book combines experience from academia and industry in the field of industrialization, i.e. in all processes involved in the conversion of research into successful operations. Enterprises are facing major challenges in a world of fierce competition and globalization. Process engineering techniques provide Process Industries with the necessary tools to cope with these issues.

The chapters of this book give a new approach to the management of technology, projects and manufacturing. Contents Part 1: The Company as of Today 1. Creating the Intellectual - Eddy U 2019-04-30 A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program. Visit [www.luminoso.org](http://www.luminoso.org) to learn more. Creating the Intellectual redefines how we understand relations between intellectuals and the Chinese socialist revolution of the last century. Under the Chinese Communist Party, "the intellectual" was first and foremost a widening classification of individuals based on Marxist thought. The party turned revolutionaries and otherwise ordinary people into subjects identified as usable but

untrustworthy intellectuals, an identification that profoundly affected patterns of domination, interaction, and rupture within the revolutionary enterprise. Drawing on a wide range of data, Eddy U takes the reader on a journey that examines political discourses, revolutionary strategies, rural activities, urban registrations, workplace arrangements, organized protests, and theater productions. He lays out in colorful detail the formation of new identities, forms of organization, and associations in Chinese society. The outcome is a compelling picture of the mutual constitution of the intellectual and the Chinese socialist revolution, the legacy of which still affects ways of seeing, thinking,

acting, and feeling in what is now a globalized China.
