The Handspike - First Middlesex artillery volunteers 1867

The Encyclopedia of the Motorcycle - Peter Henshaw 2008

Motorcycles, the open road, cruising; all things associated with this powerful locomotive are detailed in this marvelous history of a stunning vehicle. Humanity is capable of many wonderful things, but the art of making motorcycles is arguably not its greatest achievement. Throughout history there have been far more pressing needs than the desire to get from A to B more quickly and more pleasurably than anyone else. And yet, thousands of entrepreneurs have gravitated to the motorcycle industry: scratch any of them, and one will most likely find an enthusiast beneath the skin. Why else would anyone be willing to risk time and money in a business notorious for its glorious failures?

The Glass Cell - Patricia Highsmith 2004-06-17

At last back in print, one of Patricia Highsmith's most disturbing works. Rife with overtones of Dostoyevsky,

The Glass Cell, first published forty years ago, combines a quintessential Highsmith mystery with a penetrating critique of the psychological devastation wrought by the prison system. Falsely convicted of fraud, the easygoing but naive Philip Carter is sentenced to six lonely, drug-ravaged years in prison. Upon his release, Carter is a more suspicious and violent man. For those around him, earning back his trust can mean the difference between life and death. The Glass Cell's bleak and compelling portrait of daily prison life—and the consequences for those who live it—is, sadly, as relevant today as it was when the book was first published in 1964.

Radio Frequency and Microwave Electronics Illustrated - Matthew M. Radmanesh 2001

Foreword by Dr. Asad Madni, C. Eng., Fellow IEEE, Fellow IEE Learn the fundamentals of RF and microwave electronics visually, using many thoroughly tested, practical examples RF and microwave technology are essential throughout industry and to a world of new applications—in wireless communications, in Direct Broadcast TV, in Global Positioning System (GPS), in healthcare, medical and many other sciences. Whether you're seeking to strengthen your skills or enter the field for the first time, Radio Frequency and Microwave Electronics Illustrated is the fastest way to master every key measurement, electronic, and design principle you need to be effective. Dr. Matthew Radmanesh uses easy mathematics and a highly graphical approach with scores of examples to bring about a total comprehension of the subject. Along the way, he clearly introduces everything from wave propagation to impedance matching in transmission line circuits, microwave linear amplifiers to hard-core nonlinear active circuit design in Microwave Integrated Circuits (MICs). Coverage includes: A scientific framework for learning RF and microwaves easily and effectively Fundamental RF and microwave concepts and their applications The characterization of two-port networks at RF and microwaves using S-parameters Use of the Smith Chart to simplify analysis of complex design problems Key design considerations for microwave amplifiers: stability, gain, and noise Workable considerations in the design of practical active circuits: amplifiers, oscillators, frequency converters, control circuits RF and Microwave Integrated Circuits (MICs) Novel use of "live math" in circuit analysis and design Dr. Radmanesh has drawn upon his many years of practical experience in the microwave industry and educational arena to introduce an exceptionally wide range of practical concepts and design methodology and techniques in the most comprehensible fashion. Applications include small-signal, narrow-band, low noise, broadband and multistage transistor amplifiers; large signal/high power amplifiers; microwave transistor oscillators, negative-resistance circuits, microwave mixers, rectifiers and detectors, switches, phase shifters and attenuators. The book is intended to provide a workable knowledge and intuitive understanding of RF and microwave electronic circuit design. Radio Frequency and Microwave Electronics Illustrated includes a comprehensive glossary, plus appendices covering key symbols, physical constants, mathematical identities/formulas, classical laws of electricity and magnetism, Computer-Aided-Design (CAD) examples and more. About the Web Site The accompanying web site has an "E-Book" containing actual design examples and methodology from the text, in Microsoft Excel environment, where files can easily be manipulated with fresh data for a new design.

Adventures on a Motorcycle - gearing up for touring & camping - Richard Mawson

More Proficient Motorcycling - David L. Hough 2010-10-26

Written as a stand-alone or follow-up to David L. Hough's wildly successful duo, "Proficient Motorcycling" and "Street Strategies," this book contains invaluable lessons for avoiding nasty accidents. Presenting new tips and topics geared toward protecting riders from road dangers with a special focus on mental and physical preparedness. Diagrams, examples, plain talk, and Hough's practical attitude make this one of the most accessible guides available.

Café Racers - Mike Clay 1988

A nostalgic look at the coffee-bar motorcycle culture of the 1950s and 60s. The book features photographs of souped-up BSAs, Triumphs, Nortons and Ducatis with technical analyses of some of the best bikes produced, from the Triumph Bonneville to the Harris Moto Guzzi.

Backyard Aluminum Casting - One Street Components 2014-08-21

Build your own aluminum casting foundry. Cast bicycle shift levers or whatever else you have in mind. Learn to melt and cast scrap aluminum for profit or just for fun. While much of this book discusses the Bike Shift Lever project (read more at OneStreet.org under Programs, One Street Components), readers will learn how to cast just about anything using scrap aluminum and make a profit doing so. In addition to

casting, the book also offers guidance on product marketing and sales. Starting with foundry and casting basics, readers learn how to build an inexpensive charcoal-fired furnace using a flowerpot or fired-clay bricks. An entire chapter is dedicated to sorting and melting scrap aluminum so that readers will always have an ample supply of quality metal for casting. The book wraps up with product marketing and sales, using Bike Shift Levers as the example, but showing how any cast aluminum product can be profitably produced in a backyard foundry. In the back of the book, readers will find: a detailed table of aluminum alloys to help them sort their scrap, the design drawings for the Bike Shift Lever. For readers interested in making Bike Shift Levers, they will learn how to become one of our license partners and receive a permanent casting mold that will hold up to many, many castings. License partners are critical to this project as we work to provide affordable, durable, and repairable shift levers to people worldwide who rely on their bicycles everyday. We also offer our license partners ongoing support for foundry solutions, marketing in their area, and bulk purchases of foundry and shift lever supplies. Backyard Aluminum Casting is for anyone who wants to try casting scrap aluminum into Bike Shift Levers or just about anything else that can be made out of aluminum."

Development Through the Lifespan - Laura E. Berk 2013-08-05

Laura Berk's *Development Through the Lifespan* is relied upon in classrooms worldwide for its clear, engaging writing style, exceptional multicultural and cross-cultural focus, cutting-edge consideration of the interrelationships between heredity and environment, rich examples, and long-standing commitment to presenting the most up-to-date scholarship. This new edition continues to offer students research-based practical applications that they can relate to their personal and professional lives. Laura Berk, renowned professor and researcher, has revised the text with new pedagogy, a heightened emphasis on the interplay between heredity and environment, and an enhanced focus on many social policy issues, while emphasizing the lifespan perspective throughout. The latest theories and findings in the field are made accessible to students in a manageable and relevant way. Berk's signature storytelling style invites students to actively learn beside the text's "characters." Students are provided with an especially clear and coherent understanding of the sequence and underlying processes of human development, emphasizing the interrelatedness of all domains-physical, cognitive, emotional, social-throughout the text narrative and in special features. Berk also helps students connect their learning to their personal and professional areas of interest. Her voice comes through when speaking directly about issues students will face in their future pursuits as parents, educators, health care providers, social workers, and researchers. As members of a global and diverse human community, students are called to intelligently approach the responsibility of understanding and responding to the needs and concerns of both young and old. While carefully considering the complexities of human development, Berk presents classic and emerging theories in an especially clear, engaging writing style, with a multitude of research-based, real-world, cross-cultural, and multicultural examples. Strengthening the connections among developmental domains and of theory and research with applications, this edition's extensive revision brings forth the most recent scholarship, representing the changing field of human development. India - The Shimmering Dream - Max Reisch 2018-09-27

This extraordinary account of a remarkable journey made in 1933, through Iraq, Iran and Baluchistan (now part of Pakistan) to India is packed full of wonder, adventure, determination and love of travel and

motorcycles. But what really sets this book apart are the wonderful descriptions of the people and cultures, now nearly forgotten, yet still hugely relevant in today's age: all brought evocatively to life by the stunning photos from 1933. At that time, the idea of travelling to India on a motorcycle through the Middle East was considered impossible; there were often no roads, not even any paths, and they were attempting to cross the burning deserts in the middle of August, on a tiny two-stroke motorcycle with barely enough power for the bike and rider, let alone a pillion passenger! This book is more than a fantastic adventure; it also offers some perceptive insights into the peoples, places and cultures of the time, as well as being full of drama, both personal and mechanical, as the motorcycle is urged on across the shimmering sands. A true window on the past - and a book which is definitely a 'must have' for all travel and motorcycle enthusiasts.
