Texas Outlaw - James Patterson 2020-03-30

To Rory Yates being a Texas Ranger is about justice, but all of that changes when he is brought to a small southern town to help uncover the mysteries behind a local woman's death—only to discover corruption and lies. Texas Ranger Rory Yates is not keen for hero status. But it's unavoidable once his girlfriend, country singer Willow Dawes, writes a song about his bravery. Rory escapes his newfound fame when he's sent to the remote West Texas town of Rio Lobo, a municipality with two stoplights. And now, according to the Chief of Police, it has one too many Texas Rangers. Rio Lobo Detective Ariana Delgado is the one who requested Rory, and the only person who believes a local councilwoman's seemingly accidental death is a murder. Then Rory begins to uncover a tangle of small-town secrets, favors, and lies as crooked as Texas law is straight. To get to the truth before more people die, Rory is

forced to take liberties with the investigation.

The next ballad of Rory Yates may not be about a hero, but rather an outlaw song.

Psychological Governance and Public Policy -
Jessica Pykett 2016-12-01

There have been significant developments in the state of psychological, neuroscientific and behavioural scientific knowledge relating to the human mind, brain, action and decision-making over the past two decades. These developments have influenced public policy making and popular culture in the UK and elsewhere - through policies and emerging social practices focussed on behavioural change, happiness, wellbeing, therapy, resilience and character. Yet little attention has been paid to examining the wider political and ethical significance of the

widespread use of psychological governance techniques. There is a pressing and recognised need to address the behaviour change agenda in relation to how our cultural ideas about the brain, mind, behaviour and self are changing. This book provides a critical account of existing forms of psychological governance in relation to public policy. It asks whether we can speak of a co-ordinated and novel shift in governance or, rather, whether these trends are more simply pragmatic policy tools based on advances in scientific evidence. With contributions from leading scholars across the social sciences from the UK, the USA and Canada, chapters identify practical, political and research challenges posed by the current policy enthusiasm for particular branches of affective neuroscience, behavioural economics, positive psychology and happiness economics. The core focus of this book is to investigate the ways in which knowledge about the mind, brain and behaviour has informed the methods and techniques of

governance and to explore the implications of this for shaping citizen identity and social practice. This groundbreaking book will be of interest to students, scholars and policy-makers interested and working within geography, economics, sociology, psychology, politics and cultural studies.

The Moor's Last Stand - Elizabeth Drayson
2017-04-20

In 1482, Abu Abdallah Muhammad XI became the twenty-third Muslim King of Granada. He would be the last. This is the first history of the ruler, known as Boabdil, whose disastrous reign and bitter defeat brought seven centuries of Moorish Spain to an end. It is an action-packed story of intrigue, treachery, cruelty, cunning, courtliness, bravery and tragedy. Basing her vivid account on original documents and

sources, Elizabeth Drayson traces the origins and development of Islamic Spain. She describes the thirteenth-century founding of the Nasrid dynasty, the cultured and stable society it created, and the feuding which threatened it and had all but destroyed it by 1482, when Boabdil seized the throne. The new Sultan faced betrayals by his family, factions in the Alhambra palace, and ever more powerful onslaughts from the forces of Ferdinand and Isabella, monarchs of the newly united kingdoms of Castile and Aragon. By stratagem, diplomacy, courage and strength of will Boabdil prolonged his reign for ten years, but he never had much chance of survival. In 1492 Ferdinand and Isabella, magnificently attired in Moorish costume, entered Granada and took possession of the city. Boabdil went into exile. The Christian reconquest of Spain, that has reverberated so powerfully down the centuries, was complete.

Cost Accounting - Cecily A. Raiborn 2005-02-01
The most practical, real-world presentation of cost accounting on the market, this book blends a traditional and proven method of teaching cost accounting with the integration of innovative topics. Cost topics are covered in the context of organizational strategy and operational tactics, as cost management decisions are sensitive to strategies driven by quality, cost, and innovation. Kinney, Prather-Kinsey, and Raiborn reinforce the material with real-world examples and visual illustrations that bring cost management techniques into the student's

sphere of understanding. A flexible organization appropriate for either a one- or two- semester course--coupled with clear and abundant visual presentations--allows students to clearly understand difficult topics. The text's revised organizational structure streamlines chapter materials as well as reduces redundancy between cost accounting and other business courses.

Genealogy Standards Second Edition - Board for Certification of Genealogists 2019-09-26
Family historians depend upon thousands of people unknown to them. They exchange research with others; copy information from books and databases; and write libraries, societies, and government offices. At times they even hire professionals to do legwork in distant areas and trust strangers to solve important problems. But how can a researcher be assured that he or she is producing or receiving reliable results? This official manual from the Board of Certification for Genealogists provides a standard by which all genealogists can pattern their work.
